Subject: Supplemental Proposal for Construction Documents for **Madison Street Improvements Phase 2: Madison Street Streetscape (Oak Park Ave to East Ave)**

Dear Ms. Pavlick:

Christopher B. Burke Engineering, Ltd. (CBBEL) is pleased to submit this supplemental proposal for landscape architecture and professional engineering services based on the current development configuration for the subject project. This proposal includes our Understanding of the Assignment, Scope of Services, Project Design Timeline, and Estimate of Fee.

**UNDERSTANDING OF ASSIGNMENT**

This continues the in-progress design for the Madison St corridor. To date there has been greater than anticipated coordination/design efforts with the two adjacent developers to get to their current development configurations, which also added extensive additional private utility relocation and added water/sewer design projects for S Euclid and for N Euclid. Also included were bid alternates in the Project "9-12 Madison St Improvements (Harlem to Austin)".

With this supplement the Team will pick up the project from the Preliminary Submittal Design for Madison Street Streetscape from Oak Park Ave to East Ave (based on the current development configuration) and take it through the bidding process as well as assist with construction design items and Developer's finalization of their designs.

The streetscape project includes new decorative LED lighting, pavement rehabilitation, pavement markings, signage, trash receptacles, bike racks, ADA sidewalk improvements, spot repair of sidewalk/driveways/curbs, and new 16" water main project wide. Many blocks will also have sidewalk/parkway replacement (with pavers, benches, seating planters,

planters, and new trees/landscaping), new curb/gutter, and the S Westly intersection will be paved with pavers. Soils investigation, traffic analysis, and traffic signal upgrades are not included in this scope. Improvements will extend to the Developer's facades/parking lot edges, to the ROW in other areas, and approximately 75' down each side street.

### **SCOPE OF SERVICES**

CBBEL proposes the following scope of services for the projects.

**Task 1 – Engineering Review Input of Developers' Plans:** CBBEL will review Developer's plans as it relates to right of way improvements and an provide review comments for Village's consideration in their review of Developer's submittals. CBBEL will update project design impacted by Developer revisions as needed. This task will be deemed completed when the fee has been expended.

**Task 2 – Pre-Final Plans, Specifications and Cost Estimate:** CBBEL will prepare contract documents consisting of plans and specifications. We will also prepare estimate of time, estimate of construction cost, Photometric Calculations Report, and disposition of Village's comments on Preliminary Submittal. Plans will be updated based on Village's comments on the Preliminary Plans/Estimate of Cost. The following sheets will be included in the plans:

Sheet	No. of Sheets
Cover Sheet	1
General Notes/Index of Sheets	3
Schedule of Quantities	3
Alignment, Ties and Benchmarks (1"=100')	2

CBBEL will use IDOT standard pay items or Village standard special provisions where applicable. Otherwise, project-specific special provisions will be written as needed.

CBBEL will also make any required submittals to IEPA to meet NPDES requirements and to MWRD for sewer replacement.

Our sub-consultant Altamanu, Inc. will provide plan and detail sheets related to landscaping, site furniture, pavers, and specialty pavement/sidewalk treatments, along with associated special provisions, quantities and estimate of cost.

Documents will include two Alternate Bid sections; one for each of the developer's restoration footprints within the proposed improvements.

These Pre-Final submittal items will be provided to the Village for review.

**Task 3 - Final Plans, Specifications and Estimates:** The Team will revise and finalize the contract documents and estimate of cost upon receiving comments from the following:

- Village's comments on Pre-Final submittal
- Pete's Fresh Market Developer comments.
- Senior Living Facility Developer comments.
- Utilities.

These Final submittal items will be provide to the Village for approval.

**Task 4 - Bid Documents:** In addition to printed copies, we will provide the plans, specifications and estimate to the Village in electronic format. We will also provide addenda as needed and review the Bid Tabulations and make recommendations. We will also provide the plans (electronic format) to the affected utilities.

**Task 5 – Village Coordination, Project Management, and QAQC:** The Team will meet with the Village and other key stakeholders to review comments on submittals and project progress. We anticipate five meetings with Village Staff (1 Staff Meeting, 1 District/Steering committee meeting, 1 Developer Coordination meeting, and 2 Utility Coordination Meeting). CBBEL will prepare agendas, presentation materials, and meeting minutes for these meetings.

CBBEL Staff will be responsible for progress reports, scheduling, invoicing, technical direction of staff and sub-consultants, project management and coordination. CBBEL Staff will QA/QC Task deliverables overall and receive sub-consultant qaqc forms.

**Task 6 – Design Assistance During Construction:** Design modifications maybe needed to resolve issues that arise during construction. CBBEL and Altamanu will be available at Village's request to answer questions and provide clarification of drawings and specifications during construction as needed. This task will be deemed completed when the fee has been expended.

Subject: Proposal for Construction Documents for Madison Street Improvements  
Phase 1: Madison Street Streetscape (Oak Park Ave to East Ave) and  
Bike Lane Pavement Marking (Harlem Ave to Oak Park Ave and East  
Ave to Austin Blvd) Project

Dear Ms. Pavlick:

Christopher B. Burke Engineering, Ltd. (CBBEL) is pleased to submit this proposal for landscape architecture and professional engineering services for the subject project. CBBEL will be the prime consultant with Altamanu, Inc (Landscape Architecture) and Sam Swartz Engineering (Civil Engineering support) completing our team. This is the same original team that developed the concept in 2011. This proposal includes our Understanding of the Assignment, Scope of Services, Project Design Timeline, and Estimate of Fee.

**UNDERSTANDING OF ASSIGNMENT**

We understand that the Village of Oak Park would like to proceed with the preparation of construction plans and specifications for the first phase of the Madison Street Improvements Project, financed entirely with Village funds. The Village looks to have this first phase under construction in 2016.

The first phase of the Madison Street Improvements is understood to include streetscape enhancements from Oak Park Ave to East Ave (a distance of approximately 1,350 ft.), and bike lane creation via pavement markings from Harlem Ave to Oak Park Ave (a distance of approximately 3,000 ft.) and from East Ave to Austin Blvd (a distance of approximately 3,950 ft.). The total project length is approximately 8,150 ft (1.54 miles).

The streetscape enhancements will include: removals of existing sidewalk, driveways, curb/gutter, curblin drainage structures, parking lane pavement, parkway trees, landscaped medians, and lighting. Proposed elements include new ADA compliant sidewalk, driveways, protected bike lane, parking lane, ornamental lighting, trees, trees in grates, parkway pavers, new pavement/pavement patches, resurfaced roadway, pavement markings, regulatory roadway signage, planters, and site furniture (benches, bike racks, planter pots, trash cans). Other improvements may include; bioswales, irrigated planters/parkways (performance based specification/plans), decorative pavement treatments, decorative sidewalk treatments, spot water main improvements, spot sewer main improvements, crossing improvements at Kenilworth Ave, and crossing improvements at Scoville Ave. Drainage improvements also include sewer replacement (approx 415 ft of 15" sewer) from Oak Park Ave to Euclid Ave. Signal modifications (head location, cable, and timing) will be made – the existing poles/mast arms and handholes will be maintained. Temporary items include: sediment erosion and control, traffic control, and pedestrian access management.

Bike lane creation includes: removal of pavement markings, and proposed pavement markings, regulatory signage and bike racks. Signal modifications (head location, cable, and timing) will be made – the existing poles/mast arms and handholes will be maintained. Temporary items include traffic control. From Harlem Ave to Oak Park Ave the bike lanes will be created via a road diet from 2 vehicle lanes in each direction to one vehicle lane in each direction separated by a two way left turn lane. Due to corridor's width, the bike lane will have no buffer at the vehicle lane or the parking lane. Parking will be maintained on each side of Madison Street. From East Ave to Austin Blvd the bike lanes will be created via a road diet from 2 vehicle lanes in each direction to one vehicle lane in each direction separated by the existing median lane (flush and planted barrier medians). Due to corridor's wide width, the bike lane will have buffer at the vehicle lane and at the parking lane. Parking will be maintained on each side of Madison Street.

### **SCOPE OF SERVICES**

CBBEL proposes the following scope of services for the projects.

**Task 1 – Kick-off Meeting, Site Visits, and Data Collection:** The Project Team will attend project kick-off meeting with the Village to discuss the project objectives and to refine the project scope, as necessary. The Team will visit the site as-needed to gather/confirm provided information. The team will collect, examine, review and evaluate data provided by the Village. This data will include at least the following base information:

- Village Design Standards
- Village Bld Book Template
- Topographic/cross-sectional/utility survey (Concurrent separate Village contract)

- PESA/PSI/Geotechnical information (Concurrent separate Village contract)
- Madison Street Master Plan (Concurrent separate Village contract with Altamanu)
- Abutting private development concepts/plans
- Sewer inspection reports (streetscape section)

**Task 2 – Preliminary Plans and Cost Estimate:** CBBEL will prepare contract documents consisting of plans, anticipated construction schedule, and order of magnitude estimate of construction cost. Plans will be prepared in accordance with Village/IDOT design standards and will be in English units. The following sheets will be included in the plans:

Sheet	No. of Sheets
Cover Sheet	1
Typical Sections - Streetscape	2
Typical Sections – Bike Lanes	1
Maintenance of Traffic Typical Sections and Staging Notes	2
Proposed Streetscape Plans (1" = 20')	4
Proposed Landscape Plan (1" = 20')	4
Proposed Bike Lanes Plan (1" = 50')	8
<b>Total</b>	<b>23</b>

Our sub-consultant Altamanu, Inc. will provide proposed landscape sheets and cost. Our sub-consultant Sam Schwartz will provide engineering assistance (bike facilities, etc.)

These Preliminary submittal items will be provide to the Village for review and for Village's Topographic/cross-sectional and utility survey (concurrent separate Village contract) project's use in finalizing their deliverables.

**Task 3 – IDOT Coordination:** The Preliminary Plans will be used to determine geometric and minor signal modifications (head location, cable, and timing) at IDOT intersections: Harlem/Madison and Ridgeland/Madison. These intersections are within the Bike Lanes segments and only pavement marking/signal modifications are proposed.

CBBEL will direct our sub-consultant (Fish Transportation) to collect traffic counts at the IDOT intersections. CBBEL will analyze intersection capacity for the existing/proposed conditions. We will then meet with IDOT for concurrence on design parameters and required deliverables. We will then create/submit, as needed, Intersection Design Studies and other required items for IDOT review/approval.

**Task 4 – Pre-Final Plans, Specifications and Cost Estimate:** CBBEL will prepare contract documents consisting of plans and specifications. We will also prepare estimate of time, estimate of construction cost, Photometric Calculations Report, and disposition of Village's comments on Preliminary Submittal. Plans will be updated based on Village's comments on Task 3 items and updated Village's Topographic/cross-sectional and utility survey. The following sheets will be included in the plans:

Sheet	No. of Sheets
Cover Sheet	1
General Notes/Index of Sheets	1

<b>Total</b>	<b>90</b>

CBBEL will use IDOT standard pay items or Village standard special provisions where applicable. Otherwise, project-specific special provisions will be written as needed.

CBBEL will also make any required submittals to IEPA to meet NPDES requirements and to MWRD for sewer replacement.

Our sub-consultant Altamanu, Inc. will provide plan and detail sheets related to landscaping, site furniture, pavers, and specialty pavement/sidewalk treatments, along with associated special provisions, quantities and estimate of cost.

These Pre-Final submittal items will be provide to the Village for review and for Village's Topographic/cross-sectional and utility survey (concurrent separate Village contract) project's use in finalizing their deliverables.

**Task 5 - Final Plans, Specifications and Estimates:** The Team will revise and finalize the contract documents and estimate of cost upon receiving comments from the following:

- Village's comments on Pre-Final submittal
- IDOT comments on Preliminary submittal and on items submitted as part of Task 3.
- Finalized Village's Topographic/cross-sectional and utility survey deliverables

These Final submittal items will be provide to the Village for approval.

**Task 6 - Bid Documents:** In addition to printed copies, we will provide the plans, specifications and estimate to the Village in electronic format. We will also review the Bid Tabulations and make recommendations. We will also provide the plans (electronic format) to the affected utilities.

**Task 7 - Village Coordination, Project Management, and QA/QC:** The Team will meet with the Village to review comments on submittals and project progress. We anticipate four meetings with Village Staff (including district/steering committee meetings). CBBEL will prepare agendas, presentation materials, and meeting minutes for these meetings.

CBBEL Staff will be responsible for progress reports, scheduling, invoicing, technical direction of staff and sub-consultants, project management and coordination. CBBEL Staff will QA/QC Task deliverables overall and receive sub-consultant qa/qc forms.
