Agenda Item Title

A Resolution Approving an Independent Contractor Agreement with A & B Landscaping and Tree Service, Inc. for Village Wide Parkway Tree Removal and Stumping Services in 2021 in an Amount Not to Exceed \$270,000.00 and Authorizing its Execution

Overview

The Village has over 18,000 public trees on parkways and in other public spaces. Each year a portion of those trees need to be removed. The Village contracts for these services. Tree removal contractors are also called on to provide emergency services such as storm damage clean-up and

emergency tree removal. This contract with A & B will also include the removal of parkway tree stumps generated by all parkway tree removal work.

Recommendation

Approve the Resolution.

Fiscal Impact

The proposed Fiscal Year 2021 budget recommends a total of \$150,000.00 for Parkway Tree Removal, \$50,000.00 for Storm Clean-up, and \$120,000.00 for Parkway Tree Stumping in the General Fund, External Support account no. 1001-43800-741-530667.

A total of \$270,000.00 from this account is proposed to be awarded to A&B Landscaping and Tree Service, Inc. for these services: \$125,000 for Parkway Tree Removal, \$25,000.00 for Storm Clean-up, and \$120,000 for Parkway Tree Stumping. An agreement with another tree removal contractor is proposed under another agenda item.

Background

In September 2020 Village staff requested bids for three separate Fiscal Year 2021 tree maintenance practices (pruning, removal, and stumping) under a "Comprehensive Tree Maintenance Bid" for services in 2021. A&B Landscaping and Tree Service, Inc. of Riverside, IL was approved as one of the low responsive bidders for Parkway Tree Removal and Stumping Services.

The Village has over 18,000 public trees on parkways and in other public spaces. Each year a portion of those trees need to be removed due to disease (Dutch elm disease), insect infestation (Emerald ash borer), storm damage and senescence. The Village contracts for these services through a year-long contract that invoices at different rates depending on the season. Tree removal contractors are also called on to provide emergency services such as storm damage clean-up and emergency tree removal.

Experience over the last several years has determined that a single contractor can have difficulty keeping pace with removals and storm damage demands, especially if weather conditions for the season are severe. Staff has started the practice of contracting with multiple contractors for removal contracts to assure removal within a timely manner and meeting the goals before the end of the contract period.

The Public Works Department recommends contracting with two contractors for parkway tree removal and emergency services. Services will be rendered and paid for based on the appropriate seasonal rate group. A&B Landscaping and Tree Service, Inc. has completed this work for the Village in a professional manner and is recommended to continue to provide the Village this service. The contract for the other contractor, Dave Tree Care and Landscape, Inc., is under a separate agenda item.

Tree Stump Grinding is a necessary part of the tree removal process. At one time in the past tree stump grinding was included as an incidental service to the tree removal price. Staff has found that the Village is better served by contracting out for these services on their own. Stumps are removed

in a more timely and efficient manner at a lower cost. A&B Landscaping and Tree Service came in as the low bidder for this work.

Alternatives

The Board can delay action to gain additional information.

Previous Board Action

The Village Board approved funding for the program as part of the Fiscal Year 2021 budget and has approved tree removal contractor agreements annually.

Citizen Advisory Commission Action

N/A.

Anticipated Future Actions/Commitments

It is anticipated that the Public Works Department will be bringing this agreement to the Village Board annually.

Intergovernmental Cooperation Opportunities

The Park District of Oak Park and the Library were invited to participate in the bid process and include their proposed 2021 work in the bid package. The Park District included removal and pruning specifications in the bid package and collected pricing.

23 THIS INDEPENDENT CONTRACTOR AGREEMENT ("Contract") is entered into on this day of November, 2020, by and between the Village of Oak Park, an Illinois home rule municipal corporation (hereinafter the "Village"), and A & B Landscaping and Tree Service, Inc., an Illinois Corporation (hereafter the "Contractor").

WHEREAS, Contractor submitted a Bid dated September 23, 2020 a copy of which is attached hereto and incorporated herein by reference, to provide Village Wide Parkway Tree Removal and Stumping Services (hereinafter referred to as the "Work") for the public ways in the Village (hereinafter referred to as the "Project") pursuant to the Village's Request for Bids dated September 9, 2020, incorporated herein by reference as though fully set forth; and

The Contractor shall complete the Project in accordance with any applicable manufacturers' warranties and in accordance with the Village's Request for Bids, the Contractor's Bid and this Contract, all of which together shall constitute the Contract Documents. The Contractor hereby represents and warrants that it has the skill and experience necessary to complete this project in a good and workmanlike manner. The Contractor further represents and warrants that the

Project will be completed in a good and workmanlike manner in accordance with the Contract Documents, and that the Project will be free from defects.

This amount is not a penalty, and the parties agree to said amount given the difficulties associated with determining or calculating damages to the Village in the event the Project is not completed on time. The Contractor shall have no claim for damages, for compensation in excess of the Contract Price, or for a delay or extension of the Contract Time based upon conditions found at, or in the vicinity of, the site.

3. DESIGNATED REPRESENTATIVES

Contractor shall designate in writing a person to act as its designated representative with respect to the Work to be performed under this Contract who shall have the power and authority to make or grant or do all things, certificates, requests, demands, approvals, consents, notices and other actions required that are ministerial in nature or described in this Agreement for and on behalf of Contractor and with the effect of binding Contractor. 5. PAYMENT SCHEDULE

The Contractor shall, as a condition precedent to its right to receive any payment, submit to the Village an application for payment and such receipts, vouchers, and other documents as may be necessary to establish the Contractor's payment for all labor and material and the absence of any interest whether in the nature of a lien or otherwise of any party in any property, work, or fund with respect to the Work performed hereunder. Such documents shall include, where relevant, the following forms, copies of which are attached hereto:

- (i) Contractor's sworn statement;
- (ii) Contractor's partial or final waiver of lien;
- (iii) Subcontractor's sworn statement(s); and
- (iv) Subcontractor's partial or final waiver of lien.

Payment by the Village shall be conditioned upon an inspection by the Village of the work completed and submission of required waivers by the Contractor. Payment by the Village shall in no way constitute a waiver of, or relieve the Contractor from, any defects in the work. All payments shall be made in accordance with the Illinois Local Government Prompt Payment Act, 50 ILCS 505/1 *et seq.* Final payment for any Work performed by the Contractor pursuant to an invoice by the Contractor shall be made by the Village to the Contractor when the Contractor has fully performed the work and the work has been approved by the Village and submission of required waivers and paperwork by Contractor. Approval of the work and issuance of the final payment by the Village shall not constitute a waiver of, or release the Contractor from, any defects in the work.

The Village shall have the right to withhold from any payment due hereunder such amount as may reasonably appear necessary to compensate the Village for any actual or prospective loss due to Work which is defective or does not conform to the Contract Documents; damage for which the Contractor is liable hereunder; liens or claims of liens; claims of third parties, subcontractors, or material men; or any failure of the Contractor to perform any of its obligations under this Contract. The Village may apply any money withheld or due Contractor hereunder to reimburse itself for any and all costs, expenses, losses, damages, liabilities, suits, judgments, awards, and attorney's fees incurred, suffered, or sustained by the Village and chargeable to the Contractor.

6. TERMINATION

Such obligation shall not be construed to negate, abridge or otherwise reduce any other right to indemnity which the Village and its officers, officials, employees, volunteers and agents would otherwise have. The Contractor shall similarly protect, indemnify and hold and save harmless, the Village and its officers, officials, employees, volunteers and agents against and from any and all claims, costs, causes, actions and expenses, including, but not limited to, legal fees incurred by reason of the Contractor's breach of any of its obligations under, or the Contractor's default of, any provisions of this Contract. 6. Method of Measuring

Trees to be pruned shall be measured per inch of diameter. The diameter shall be measured at a point four feet (4') six inches (6") above the highest ground level at the tree and will be determined by dividing the measured circumference at that point by 3.1416.

7. Pruning Specifications

a. All Trees

- i. Trees to be pruned in accordance with the revised Pruning Standard for Shade Trees, latest edition, ANSI A300 pruning standards.
- ii. Prune all trees so the natural form and shape of the tree is achieved so far as is possible. Appropriate crown reduction methods are preferred where parkway width is sufficient to gain specified clearances, particularly when pruning Tilia species and trees in the 6"-16" size class.
- iii. Balance tree evenly along the parkway. Do not unnecessarily raise trees on the sidewalk side to match street clearances.
- iv. Lower branches must be raised to a height of allowing a minimum of 8 feet of pedestrian access on the sidewalk at the end of a four-year period. .
- v. Raise all lower branches and hanging branches to a minimum height of 16 feet where practical and if possible on trees over 16" in diameter over the street.
- vi. No more than approximately one-fourth of foliage of the tree shall be removed.
- vii. Upon completion of pruning, there shall be a minimum of 15 feet clearance from house and buildings (including roofs). Situations where this minimum cannot be met without undue harm to the tree need to be approved by the Director of Public Works or his designee.
- viii. Remove all dead, dying, diseased, interfering, objectionable and weak branches and stubs greater than one inch in diameter from all trees. Remove all sucker growth on the main trunk(s) to first main crotch.
- ix. To avoid misunderstanding, the terms in parts "viii" above will be used as defined below:
 - a. "Sucker Growth" - The bushy and undesirable growth of small shoots on the trunk of a tree or in close proximity to the trunk.
 - b. "Interfering Branches" - Branches which are growing in contact with or within (15) feet of signage, manmade structures or overhanging a structure.

- c. "Objectionable Branches" - Branches, which are growing in such a manner that, they cause unnecessary crowding, or are undesirable if the natural form and shape of the tree is to be achieved, or are growing in a direction heading into the crown of the tree.
- x. Remove one of two or more crossed and/or rubbing branches greater than 1 inch in diameter from all trees where practical.
- xi. All cuts to be made sufficiently close to parent limb, without cutting into the branch collar or leaving a protruding stub, so that closure can readily start under normal conditions.
- xii. Rope down all branches where damage could be incurred by gouging of a sodded area and/or damage to public walks. Use caution where there is the possibility of damaging adjacent privately owned shrubs, trees, or flowers.
- xiii. Pre-cut all limbs being removed whenever there is a possibility of stripping the bark.
- xiv. Report any structural weakness, decayed trunk or branches, split crotch or branches, or girdling roots within 24 hours of locating to the Director of Public Works or his designee.
- xv. No person working in trees shall use shoes with spikes or any other footwear, which will, in the Village's opinion, injure the trees while work is being performed. At no time shall any person working in trees for pruning purposes wear spurs or climbing irons.
- xvi. Clear all streetlight and traffic control devices including non-illuminated signage to allow adequate lighting and sign visibility for the length of the prune cycle. Clear small parkway trees to allow natural growth habit without severely altering the form of the larger tree.
- xvii. It will be the Contractor's responsibility to notify and make arrangements with the utility company for the removal of branches extending through power and/or telephone lines, so the pruning operations will not be delayed.

b. For trees 1"-16" in diameter:

Trees within this size class must be pruned in a top down method. Achieving a strong central leader along with a strong scaffold structure is of primary importance.

- i. Prune for central leader by removing or subordinating co-dominant stems with reduction cuts.
- ii. Prune for scaffold limb selection. Thinning or subordinating cuts may need to be made to these branches to slow their growth rate.
- iii. Potential scaffold branches should be vertically spaced 18" apart. Scaffold branches to remain on mature tree should be spaced at 3 feet if growing above one another.
- iv. Scaffold branches should be no more than ½ the diameter of the trunk immediately above the branch
- v. Retain lateral branches along limbs, but each should be less than ½ the diameter of the limb at attachment.
- vi. At least ½ of the foliage should be on branches (temporary and permanent) arising in the lower 2/3 of the tree. Similarly, branches should have like distribution of foliage along their length.

8. Cleanup

Immediately after pruning of a tree has been completed, the area beneath the tree shall be raked and all debris shall be removed from the area. If the project supervisor is not onsite at all times another staff member must be a "Certified Arborist" or "Certified Tree Worker". They must have the authority to direct the work onsite. They must be able to speak articulately to residents and Village staff about the work occurring onsite.

These records must be turned into the Director of Public Works office, emailed, or faxed each Monday. The report will include the proposed work to be completed in the village for the week and an actual work completed report, including the specific days individual trees were pruned for the previous week.

The Director of Public Works or his designate will review the completed work and provide a punch list for trees and locations that have not met the specifications of the contract. The bidder will not be paid for an invoice including those locations until the associated punch list items have been addressed and confirmed complete.

This notice will be provided by the Village and will be either a door hanger or a post-it note to attach to the front door or window.

10. J.U.L.I.E.

The Contractor is responsible for any damage done to underground utilities while working in the parkway. The Contractor will submit the stump list to J.U.L.I.E. to be located prior to stump removal. The Contractor must submit the list to J.U.L.I.E. no more than three (3) working days after receipt from the Village. The Contractor must otherwise comply with all J.U.L.I.E. requirements.

11. Sucker Growth

In the event that adventitious (sucker) growth should occur, the contractor shall be responsible for regrinding to eliminate sucker growth during a period of one year after initial grinding. Re-grinds must also be restored to grade and reseeded at no additional charge to the Village. Care shall also be taken not to damage other trees, shrubs, or lawns during stump removal and restoration operations.

12. Method of Measuring

Stump removal shall be done on a flat rate, "per stump" basis.

13. Reporting

The bidder is responsible for keeping the Village updated on its work. The Village requires that the bidder provide immediate notice upon completing grinding and cleaning for inspection. The bidder must also alert the Village to completion of a list for inspection and assignment of additional stumps.

14. Add On Parkway Restoration

The bidder shall provide pricing for parkway restoration work. In some instances the parkway may be so disturbed or changed as a result of the parkway tree or the tree removal process that entire restoration with the installation of sod may be called for. These locations will be identified by the Village and the total square yardage of the proposed restoration will be determined. The bidder will be required to remove any additional material or bring in additional top soil to restore the original grade of the parkway between the sidewalk and the curb for the length determined by the Village. The bidder will then install sod at the location. Pricing will be based on a square yard price for sod installation. All additional work, not including the parkway tree stumping is incidental to the sod price. If stumping is required at one of these locations it will be paid at the regular contract rate in addition to the square yard sod installation price.

Detailed Specifications

Removals

1. Location of Tree Removal Work

The location of the work will be the twenty-three (23) Park District sites within the Village of Oak Park, Illinois. All designated trees in the parks shall be removed and the stumps ground to a minimum four to eight inches (4-8") below grade. All tree removal work is to be done in accordance with the enclosed removal specifications.

It will be the bidder's responsibility to arrange all J.U.L.I.E. studies and to notify and make arrangements with the utility company for the removal of branches extending through power and/or telephone lines so removal operations will not be delayed.

The bidder shall protect sidewalks, curbs, streets, manhole covers and catch basins, housing property and automobiles from the impact of falling wood by the use of limb ground supports when needed.

2. Method of Measuring

Trees to be removed shall be measured per inch of diameter. The diameter shall be measured at a point four feet (4') six inches (6") above the highest ground level at the tree and will be determined by dividing the measured circumference at that point by 3.1416.

3. Commencement of Work

The bidder shall remove all selected trees within time frame specified for those removals unless the Superintendent of Buildings & Grounds grants an extension.

Trees will be marked with a paint dot on the trunk.

4. Cleanup

Immediately after removal of a tree has been completed, the area beneath the tree shall be raked and all debris shall be removed from the area. All streets, driveways,

and sidewalks shall be swept clean. Care shall also be taken not to damage other trees, shrubs, or lawns during tree removal operations.

5. Removal of Stumps and Debris

All stumps shall be ground to a depth of four (4) to eight (8) inches below grade. All grindings and all debris from tree removal operations shall be removed from the site and from the Village of Oak Park within twenty-four (24) hours after debris has been placed, unless authorized by Superintendent of Parks & Planning or his representative. No on site or Park District owned areas will be designated as log storage areas. Payment for removal and disposal of debris is to be included in the unit price. Additionally, no debris or logs shall be given to residents since they may harbor the Emerald Ash Borer. Under no circumstances shall debris be left on the parks over weekends or holidays. In addition, keeping debris off street and parkway areas and out of the gutters prevents the debris from entering and plugging the sewer system. Environmentally accepted practices of debris disposal are also an important part of this work.

Pruning

Location of Tree Pruning Work

1. The location of the work is known as: Park District of Oak Park, Illinois. Specific sites within the Park District for 2020/2021 are:

A) Taylor Park:	400 Division St.
B) Lindberg Park:	1000 Greenfield St.
C) Andersen Park:	824 Hayes Ave.
D) Dole Park:	255 Augusta Ave.
E) Randolph Park:	300 S. Grove Ave.

Additional requests for pruning of specific tree(s) may be made (see non- emergency pricing)

All trees over 10 inches in diameter in the designated parks shall be pruned. All tree pruning work is to be done in accordance with the enclosed pruning specifications

It will be the bidder's responsibility to notify and make arrangements with the utility company for the removal of branches extending through power and/or telephone lines so removal operations will not be delayed.

The bidder shall protect sidewalks, curbs, streets, manhole covers and catch basins, housing property and automobiles from the impact of falling wood by the use of limb ground supports when needed.

2. All trees to be pruned in accordance with the revised Pruning Standard for Shade Trees, latest edition, ANSI A300 pruning standards. Prune all trees so the natural

form and shape of the tree is achieved so far as is possible. In the case of American Elms, prune trees so a "cathedral arch" effect is achieved. Crown reduction method preferred, particularly when pruning Tilia species and trees in the 8"-16" size class, with no more than one quarter of leaf surface to be removed. Balance tree evenly. Lower branches must be raised to a height of allowing 8 feet for pedestrian access.

3. For trees 8"-16" in diameter:
 - Prune for central leader (if possible) by removing or subordinating co-dominant stems with drop-crotch cuts.
 - Prune for scaffold limb selection. Thinning or subordinating cuts may need to be made to these branches to slow their growth rate.
 - Potential scaffold branches should be vertically spaced 18" apart. Scaffold branches to remain on mature tree should be spaced at 3 feet if growing above one another.
 - Scaffold branches should be no more than $\frac{1}{2}$ the diameter of the trunk immediately above the branch
 - Retain lateral branches along limbs, but each should be less than $\frac{1}{2}$ the diameter of the limb at attachment.
 - At least $\frac{1}{2}$ of the foliage should be on branches (temporary and permanent) arising in the lower $\frac{2}{3}$ of the tree. Similarly, branches should have like distribution of foliage along their length.
4. Raise all lower branches and hanging branches to a minimum height of 16 feet where practical on trees over 16" in diameter. Not more than one-fourth of foliage of mature trees to be removed.
5. Contractor responsible for re-prunes for a period of one year after completion of pruning section. Remove all sucker growth on the main trunk(s) to first main crotch. Remove all dead, dying, diseased, interfering, objectionable and weak branches and stubs greater than two inches in diameter from all trees.
6. Remove one of two or more crossed and/or rubbing branches greater than 2 inches in diameter from all trees where practical.
7. All cuts to be made sufficiently close to parent limb, without cutting into the branch collar or leaving a protruding stub, so that closure can readily start under normal conditions.
8. Rope down all branches where damage could be incurred by gouging of a sodded area and/or damage to public walks. Use caution where there is the possibility of damaging adjacent shrubs, trees, or flowers.
9. Pre-cut all limbs being removed whenever there is a possibility of stripping the bark.

10. Report any structural weakness, decayed trunk or branches, split crotch or branches, or girdling roots within 24 hours of locating to the Grounds Maintenance Supervisor.
11. No person working in trees shall use shoes with spikes or any other footwear, which will, in the Park District's opinion, injure the trees while work is being performed. At no time shall any person working in trees for pruning purposes wear spurs or climbing irons.
12. Upon completion of pruning, there shall be a minimum of 10 feet clearance from play equipment and buildings (including roofs).

To avoid misunderstanding, the terms in part 5 above will be used as defined below:

- A. "Sucker Growth" - The bushy and undesirable growth of small shoots on the trunk of a tree or in close proximity to the trunk.
- B. "Interfering Branches" - Branches which are growing in contact with or within (15) feet of signage, manmade structures or overhanging a structure.
- C. "Objectionable Branches" - Branches, which are growing in such a manner that, they cause unnecessary crowding, or are undesirable if the natural form and shape of the tree is to be achieved, or are growing in a direction heading into the crown of the tree.

It will be the Contractor's responsibility to notify and make arrangements with the utility company for the removal of branches extending through power and/or telephone lines, so the pruning operations will not be delayed.

The Contractor shall protect sidewalks, curbs, streets, manhole covers and catch basin, housing property and automobiles from the impact of falling wood by the use of limb ground supports when needed.

INDEPENDENT CONTRACTOR AGREEMENT

THIS INDEPENDENT CONTRACTOR AGREEMENT ("Contract") is entered into on this _____ day of _____, 2020, by and between the Village of Oak Park, an Illinois home rule municipal corporation (hereinafter the "Village"), and _____, a _____ (hereafter the "Contractor").

WHEREAS, Contractor submitted a Proposal dated _____, _____, a copy of which is attached hereto and incorporated herein by reference, to provide _____ (hereinafter referred to as the "Work") for the _____ (hereinafter referred to as the "Project") pursuant to the Village's Request for Proposals dated _____, _____, incorporated herein by reference as though fully set forth; and

WHEREAS, the Contractor represented in said Proposal that it has the necessary personnel, experience, and competence to promptly complete the Project and the Work required hereunder (hereinafter referred to as the "Work"); and

WHEREAS, Contractor shall perform the Work pursuant to the terms and conditions of this Contract.

NOW, THEREFORE, in consideration of the premises and the mutual promises contained in this Contract, and other good and valuable consideration received and to be received, it is mutually agreed by and between the parties as follows:

1. RECITALS INCORPORATED

The above recitals are incorporated herein as though fully set forth.

2. SCOPE OF WORK

Contractor shall perform the Work for the Project in accordance with its Proposal for a price not to exceed \$_____ plus \$_____ contingency for unforeseen conditions for a total cost of \$_____ ("Contract Price"). Contractor shall complete the Work in accordance with any applicable manufacturers' warranties and in

accordance with its Proposal, the Village's Request for Proposals, and this Contract, all of which, together shall constitute the "Contract Documents." The Contractor acknowledges that it has inspected the site(s) where the Work is to be performed and that it is fully familiar with all of the conditions at the site(s), and further that its Proposal has adequately taken into consideration all of the conditions at the sites. The Contractor hereby represents and warrants that it has the skill and experience necessary to complete the Work in a good and workmanlike manner in accordance with the Contract Documents, and that the Work shall be free from defects. Contractor shall achieve completion of all work required pursuant to the Contract Documents by _____ ("Contract Time"). The Contract Time is of the essence. In the event the Contractor fails to complete the Work on or before said date, the Village shall be entitled to liquidated damages in the amount of \$500.00 per day for each day the Work remains uncompleted beyond the completion date set forth above. This amount is not a penalty, and the parties agree to said amount given the difficulties associated with determining or calculating damages to the Village in the event the Work is not completed on time. Contractor shall have no claim for damages, for compensation in excess of the Contract Price, or for a delay or extension of the Contract Time based upon conditions found at, or in the vicinity of, the site(s).

3. DESIGNATED REPRESENTATIVES

Contractor shall designate in writing a person to act as its designated representative with respect to the Work to be performed under this Contract who shall have the power and authority to make or grant or do all things, certificates, requests, demands, approvals, consents, notices and other actions required that are ministerial in nature or described in this Agreement for and on behalf of Contractor and with the effect of binding Contractor. The Village is entitled to rely on the full power and authority of the person executing this Contract on behalf of Contractor as having been properly and legally given by Contractor. Contractor shall have the right to change its designated representative by providing the Village with written notice of such change which notice shall be sent in accordance with Section 12 of this Agreement.

The Village's _____ shall be deemed the Village's authorized representative for purposes of this Agreement, unless applicable law requires action by the Corporate Authorities, and shall have the power and authority to make or grant or do those things, certificates, requests, demands, approvals, consents, notices and other actions required that are ministerial in nature or described in this Agreement for and on behalf of the Village and with the effect of binding the Village as limited by this Contract. Contractor is entitled to rely on the full power and authority of the person executing this Agreement on behalf of the Village as having been properly and legally given by the Village. The Village shall have the right to change its authorized representative by providing Contractor with written notice of such change which notice shall be sent in accordance with Section 12 of this Agreement.

4. TERM OF CONTRACT

Contractor shall perform the Work pursuant to this Contract beginning on the effective date as defined herein and ending on the date that the Work is completed as determined by the Village. The Contractor shall invoice the Village for the Work provided pursuant to this Contract at the rates set forth in its Proposal. The term of this Contract may be extended in writing for additional periods of time pursuant to the consent of the parties.

5. PAYMENT SCHEDULE

Contractor shall, as a condition precedent to its right to receive any payment, submit to the Village an application for payment and such receipts, vouchers, and other documents as may be necessary to establish the Contractor's payment for all labor and material and the absence of any interest whether in the nature of a lien or otherwise of any party in any property, work, or fund with respect to the Work performed hereunder. Such documents shall include, where relevant, the following forms, copies of which are attached hereto:

- (i) Contractor's sworn statement;
- (ii) Contractor's partial or final waiver of lien;
- (iii) Subcontractor's sworn statement(s); and
- (iv) Subcontractor's partial or final waiver of lien.

Payment by the Village shall be conditioned upon an inspection by the Village of the Work completed and submission of required waivers by the Contractor. Payment by the Village shall in no way constitute a waiver of, or relieve the Contractor from, any defects in the work. All payments shall be made in accordance with the Illinois Local Government Prompt Payment Act, 50 ILCS 505/1 *et seq.* Final payment for any Work performed by the Contractor pursuant to an invoice by Contractor shall be made by the Village to the Contractor when Contractor has fully performed the work and the work has been approved by the Village and submission of required waivers and paperwork by Contractor. Approval of the work and issuance of the final payment by the Village shall not constitute a waiver of, or release Contractor from, any defects in the work.

The Village shall have the right to withhold from any payment due hereunder such amount as may reasonably appear necessary to compensate the Village for any actual or prospective loss due to Work which is defective or does not conform to the Contract Documents; damage for which Contractor is liable hereunder; liens or claims of liens; claims of third parties, subcontractors, or material men; or any failure of the Contractor to perform any of its obligations under this Contract. The Village may apply any money withheld or due Contractor hereunder to reimburse itself for any and all costs, expenses, losses, damages, liabilities, suits, judgments, awards, and attorney's fees incurred, suffered, or sustained by the Village and chargeable to Contractor.

6. TERMINATION

The Village may terminate this Contract for cause, which includes but is not necessarily limited to, the Contractor's failure to perform the work pursuant to this Contract. Such obligation shall not be construed to negate, abridge or otherwise reduce any other right to indemnity which the Village would otherwise have. Contractor shall similarly protect, indemnify and hold and save harmless, the Village, its officers, officials, employees, volunteers and agents against and from any and all claims, costs, causes, actions and expenses, including, but not limited to, legal fees incurred by reason of the Contractor's breach of any of its obligations under, or Contractor's default of, any provisions of this Contract.
