

Citizen Police Oversight Committee

Information and Analysis for the Village of Oak Park Board of Trustees

January 2023 to June 2023

Overview

In accordance with section 2-30-1 of Village Code, the Citizen Police Oversight Committee shall, receive and refer complaints from citizens and thereafter monitor and evaluate the processing of citizen complaints. CPOC shall monitor and evaluate the Village's efforts in ensuring racial and cultural diversity within the Police Department. And on a semi-annual basis, CPOC shall meet with and provide written reports to the Village Board concerning the Committee's activities and any information and analysis of such information which the Committee may have compiled. The Citizen Police Oversight Committee also reviews Flock ALPR reporting provided by the Oak Park Police Department.

Complaint Process

Citizen complaints may be received by the Police Department, the Village Manager's Office, the Community Relations Department or the Citizen Police Oversight Committee. All complaints are presented to the Police Department for investigation, except under extraordinary circumstances in which (1) further basic information is needed to determine the most appropriate handling of a complaint, (2) and outside investigation of a complaint is warranted or (3) in those situations in which the citizen communication is more in nature of an inquiry than a complaint. Based on the seriousness of the allegation, the complaint is identified as formal or informal. Formal investigations are those which may result in a disciplinary order of a three-day suspension or greater. Informal investigations may result in disciplinary orders of suspension not to exceed two days.

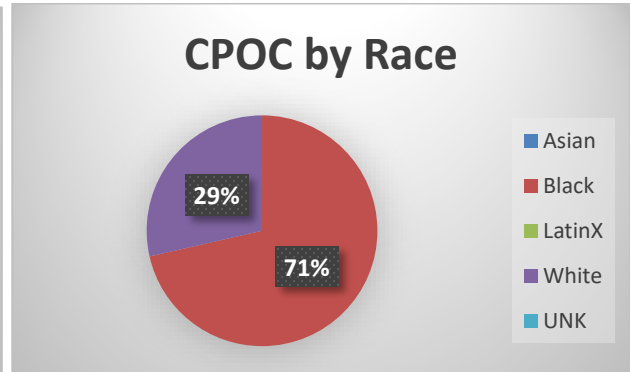

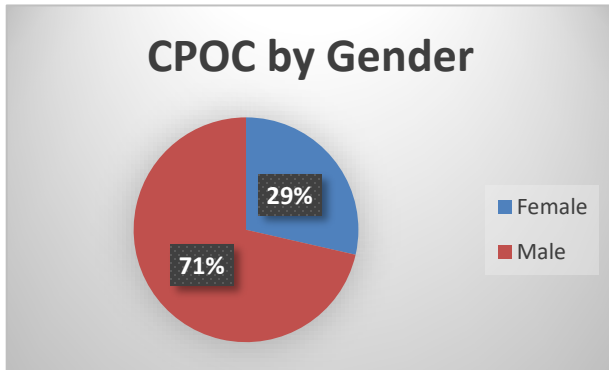

Internal investigations include a review of the complaint to determine any rule violations. These investigations may be conducted by a Watch Commander or the Internal Affairs division. All recommendations or determinations are reviewed through the chain of command to the Police Chief. The Police Chief may concur with the recommendation, overturn the recommendation or request further investigation.

Once a final determination has been made, the Department notifies the citizen complainant of any action taken or any determination based on the complaint, and further notifies the complainant of his/her right to express dissatisfaction with the outcome to the Citizen Police Oversight Committee.

The Citizen Police Oversight Committee monitors and evaluates all citizen complaints and the subsequent investigations conducted by the Police Department. Complaints that arise as a result of dissatisfaction with the Police Department's final determination are specifically reviewed by CPOC. CPOC will then provide the Village Board with a written statement of the Citizen's dissatisfaction with the Department's handling of the citizens' complaint, the investigation report upon which the Department decision was based, and any recommendation the Committee may have.

Executive Staffing = 3

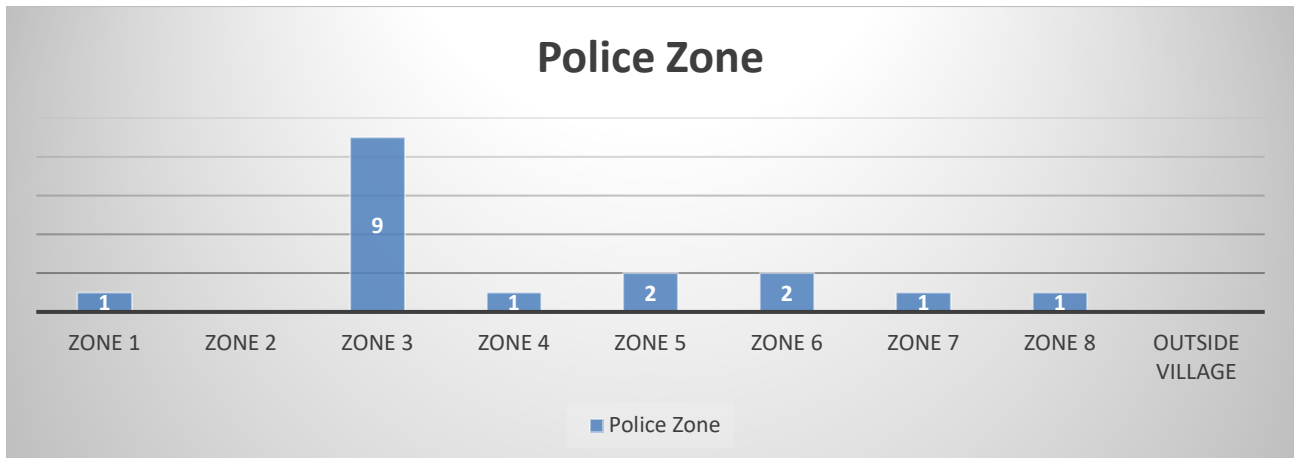

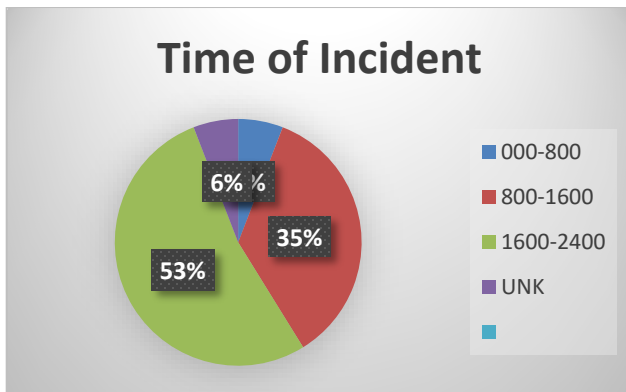

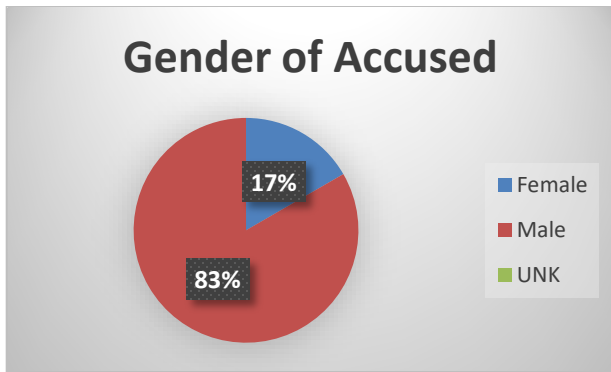

Complaint Analysis

Between January 2023 and June 2023, a total of 17 complaints were reviewed by the Citizen Police Oversight Committee. The Committee would like to note that 8 of these complaints were filed by the same individual over the course of two incidents. These complaints included allegations of bias-based policing which were not substantiated by the Citizen Police Oversight Committee. Of the 17 complaints that CPOC reviewed, 31 rule or policy violations were investigated against a total of 20 police officers or other police personnel. Of the 17 complaints, 0 resulted in a finding of an officer violating Oak Park Police Department rules and general orders. The internal investigation findings were upheld by the Citizen Police Oversight Committee by majority vote for all 17 complaints.

CPOC would also like to note that the committee began reviewing footage from officers' body worn cameras beginning this year which has eliminated the MAV violation concerns that the committee has previously raised.

FLOCK ALPR Analysis

Overview

On April 4, 2022, the Village of Oak Park Board of Trustees approved an Agreement with Flock Safety (Flock) for the purchase and implementation of eight (8) Automated License Plate Readers (ALPRs). The Village Board instructed OPPD to provide the CPOC with periodic reports to help ensure that (1) Flock system searches are conducted in accordance with Policy, and (2) any stops or direct citizen interaction resulting from Flock data are shared for purposes of transparency and accountability.

In July of 2022, the OPPD operationalized [General Order 4.68](#), governing policy and procedure for use of ALPR technology, OPPD staff were trained on the use of the Flock system and the eight ALPRs officially went “live” on July 29, 2022.

Flock Reports Reviewed by CPOC

In September, 2022, the CPOC began receiving three (3) reports at our monthly meetings:

1. **Internal (OPPD) Flock searches conducted in the previous month:** this report lists the date, time, and reason for internal (OPPD) searches of the Flock database. On average, OPPD conducts about 150 searches per month. The CPOC has not noted any concerning search behavior in its review of this report.
2. **External (outside entity) Flock searches conducted in the previous month:** this report listed the agencies that have searched the Flock database and the total number of searches conducted by each. OPPD has informed CPOC that these searches are against the nationwide Flock database and are not specific to Oak Park’s data. We have requested that this report be replaced by one that reflects external organization searches of Oak Park Flock data, specifically. OPPD reports that no outside organizations have searched our Flock camera data to-date.

3. **Activity/stops resulting from Flock alerts in the previous month:** this report includes the date, time, location, reason, results, and motorist demographics (race, gender, age). As of February 2023, it also includes race/gender of the involved officer(s). CPOC’s Flock “stops” analysis for this period is below.

Analysis This Period (August 2022 – May 2023)

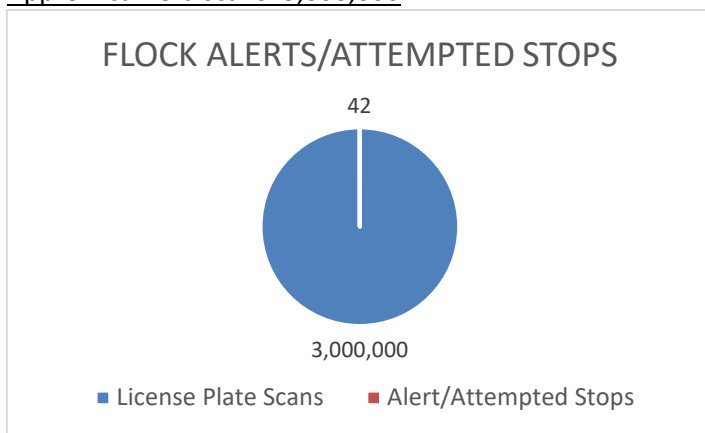

There were approximately 3 million camera scans by the 8 ALPRs during this period. **Forty-two (42) vehicles triggered Flock alerts**, prompting OPPD to attempt stops:

- 39 for “stolen vehicle”
- 2 for “fleeing/alluding”
- 1 for “connected to other crime”

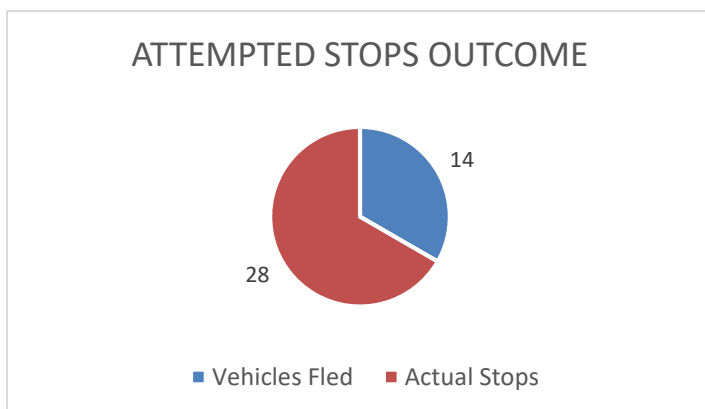

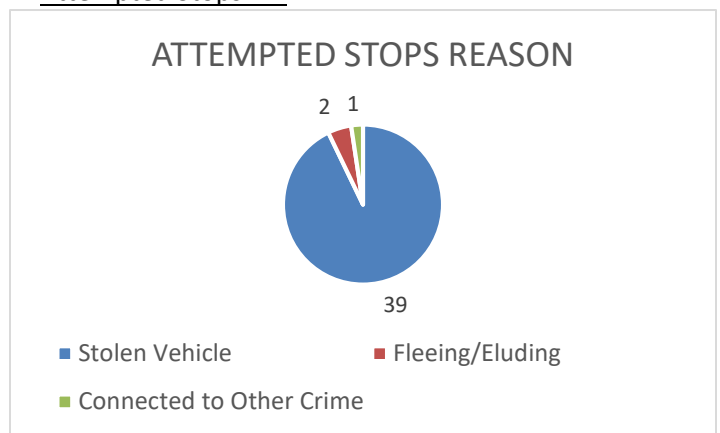

OPPD was unable to intervene with 14 of these vehicles because their driver fled or could not be located, resulting in **28 actual Flock/alert stops** during the period. Four of these stops included passengers so **32 individual occupants** were involved.

- 12 arrests were made (agencies included OPPD, Berwyn PD, Chicago PD, Cicero PD, Cook County Sheriff, Lisle PD, and Lyons PD)
 - 3 weapons were confiscated
- 8 people were released at the discretion of the lead policing agency (typically, vehicle towed and occupants released)
- 12 people were released because of data not being updated timely in the source (typically, LEADS) which is used by OPPD to verify the Flock alert before attempting a stop

Approx. camera scans: 3,000,000

Attempted Stops: 42

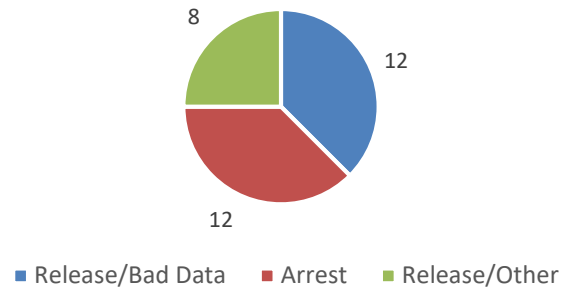

Actual Stops: 28 Vehicles w/ 32 Occupants
