

Village of Oak Park Transportation & Roadways

Oak Park benefits from a well-established grid of arterials, collectors, and local roads, while the Eisenhower Expressway provides regional mobility to Downtown Chicago and the western suburbs. Future improvements should focus on enhancing the efficiency of the current system and eliminating safety concerns for motorists, cyclists, pedestrians, and transit riders.

One specific area of concern for the Oak Park community is the Eisenhower corridor. As Village government and the community work with IDOT to define an appropriate design for the interstate, consideration should be given to a broad range of impacts that go beyond the area immediately surrounding the corridor. These include physical impacts (the actual footprint of the expressway corridor and its impact on community character), environmental impacts (air quality, noise, vibration, etc.), mobility impacts (connectivity across the corridor and access to transit services), and economic impacts (property values, business viability, etc.)
