Oak Park Fundamentals Learning Center

6441 W. North Ave.

Oak Park, IL

Special Use Standards:

1. The proposed building or use at the particular location requested is necessary or desirable to provide a service or a facility that is in the interest of the public convenience and will contribute to the general welfare of the neighborhood or community:

We have provided childcare not only for working parents, but also for teenage moms struggling to raise their children, while continuing their education, and working part time. We also collaborated with a Safe Haven non-profit agency to provide a parent literacy program, which helps facilitate life skills training. We offer the community back to school book bags and supplies for those that need assistance. Great Expectations Learning Academy has provided over 20 youth jobs during the summer for the past 5 years. Each year we are able to keep 3 out of 20 youth with part-time jobs all year round. Lastly, every year we have been able to hand out turkeys to those families that need assistance during the holiday season. We have partnered with Secretary Jesse White in this endeavor. Our philosophy is to create an environment where kids can dream and be comfortable doing it.

2. The proposed building or use will not have a substantial or undue adverse effect upon adjacent property, the character of the neighborhood, traffic conditions, utility facilities and other matters affecting the public health, safety and general welfare:

The proposed site is currently in between a massage parlor (which will be vacated shortly) and a dentist office. We see no adverse effects to the dental office that will remain. Also, we are requesting that the drop off/pick up locations be at the rear of the property in designated parking spots. It is our goal to avoid North Ave traffic as much as possible, this will help not only help our clients/students but also the local community, by not putting any additional strain on an already congested street. There is currently 11 parking spaces in the rear, which will be used for staff and clients as needed.

3. The proposed building or use will be designed, arranged and operated so as to permit the development and use of neighboring property in accordance with the applicable district regulations:

Yes, the property will maintain a design that will work (see attached plans) in accordance with all regulations and will be fully permitted by the Village of Oak Park. We have retained an architect to ensure our compliance with any regulations/codes the Village may require.

4. The proposed building or use complies with the more specific standards and criteria established for the particular building or use in question by Section 2.2.7 (Planned Development Procedures) and 4.5 (Special Uses) of this Zoning Ordinance:

Yes, our architect has reviewed all Zoning Ordinances in Section 2.2.7, we meet all criteria required to operate a day care at this site.

5. The proposed building or use has been considered in relation to the goals and objectives of the Comprehensive Plan or the Village of Oak Park:

We have had numerous Village Departments to the site (Buildings, Fire, Health and Zoning) and feel we meet all the objectives the Village has presented.

6. There shall be reasonable assurance that the proposed buildings or use will be completed and maintained in a timely manner, if authorized:

Yes, the project, if approved, is projected to be complete in two and a half months. We have retained contractors in all needed disciplines and have been assured that our time constraints will be met.
