**Stentofon
Intercom
Upgrade
Proposal**

RevCon Scope of Work

RevCon Technology Group, Inc. will furnish and install all necessary Stentofon surface mounted intercoms at designated locations at the Avenue and Holley Court Garages and the High School Parking Lot.

Intercom System Equipment and Material Listing

- 85 Stentofon TCIS-2 IP SIP intercom substations.
- 85 Surface mounted steel enclosures for above.
- 1 Lynx Controllers for call sequencing.
- 1 SNOM IP Desktop Console.

Installation and Programming

Remove existing call stations, haul away and dispose; install new back box enclosures; install new intercom call stations and make all wiring terminations; address and program each station to report to the existing security office as required. Cable installation by others (see *Customer Responsibilities*).

Inclusions

- All products are UL/ETL approved and certified.
- Two (2) year all-inclusive equipment warranty from date of installation completion.
- RevCon Technology Group, Inc. will extend our comprehensive services on the installed systems after year two to coincide with the previously installed PARC System.

Customer Responsibilities

- Provide all wiring and its installation per Stentofon specification.
- Insure all facility locations are connected to a network for the intercom purpose.

Equipment and System Descriptions

**Stentofon
TCIS-2
Intercom**

All IP stations in the Stentofon Turbine series utilize the latest technology to create unparalleled audio quality. Some of the many features include HD voice quality, Open Duplex, Active Noise Cancellation, MEMS microphone, a 10W Class D amplifier a unique speaker grille design. These features in conjunction with Stentofon's 70+ years of experience with acoustic technology are only a few of the many factors that contribute to the superior audio quality. The Terminal is an ETL approved device.

**SNOM
Desktop
Console**

The VoIP phone is optimized for professional use and comes with an integrated Gigabit Ethernet switch on board which enables connected devices to benefit from all modern network installations. With its high-resolution TFT color display and HD audio quality makes the user feel as if the caller were in the same room. The user interface was designed for clarity and intuitive operation. The Terminal is an ETL approved device.
