Rob Sproule, Public Works Director

A.M. Zayyad, Deputy Village Manager

Agenda Item Title

A Resolution Approving the Renewal of the Independent Contractor Agreement with A & B Landscaping and Tree Service, Inc. for Village Wide Parkway Tree Removal and Stumping Services in an Amount not to exceed \$205,000.00 and Authorizing its Execution

Overview

The Public Works Department is responsible for Parkway Tree Removal and Stumping. To assist in this effort, a contractor is utilized. A & B Landscaping and Tree Service, Inc. performed this work over the past year following a competitive bidding process. The Agreement provides for two possible one (1) year renewals. It is proposed to exercise the first of the two possible renewals with A&B Landscaping and Tree Service, Inc. for Fiscal Year 2025 Parkway Tree Removal and Stumping Services.

Recommendation

Adopt the Resolution.

Background

The Village has over 18,000 public trees on parkways and in other public spaces. Each year a portion of those trees need to be removed and the stumps ground out due to disease (Dutch elm disease), insect infestation (Emerald ash borer), storm damage, and senescence. The Village contracts for these services through a year-long contract. Tree removal contractors are also called on to provide emergency services such as storm damage clean-up and emergency tree removal.

In August 2023 Village staff requested bids for three separate tree maintenance services (pruning, removal, and stumping) under a "Comprehensive Tree Maintenance Bid". A&B Landscaping and Tree Service, Inc. of Riverside was approved as one of the low responsive bidders for Parkway Tree Removal and Stumping Services.

Experience over the last several years has determined that a single contractor can have difficulty keeping pace with removals and storm damage demands, especially if weather conditions for the season are severe. Staff has started the practice of contracting with multiple contractors for removal contracts to ensure removal within a timely manner and meeting the goals before the end of the contract period.

Staff recommends renewing the agreement with our two current contractors for parkway tree removal, stump

removal, cycle pruning, and emergency services. A&B Landscaping and Tree Service, Inc. has completed this work for the Village in a professional manner and is recommended to continue to provide the Village with this service. The contract for the other contractor, Davis Tree Care and Landscape, Incorporated, is under a separate agenda item.

Fiscal Impact

The proposed Fiscal Year 2025 General Fund budget includes \$125,000.00 to perform Parkway Tree Removal, \$50,000.00 to perform Storm Clean-up, \$75,000.00 to perform Parkway Tree Stumping, and \$5,000.00 to perform Private Property Tree Violation Removals in the General Fund, Forestry Division External Support account no., 1001-43800-101-530667.

A total of \$205,000.00 (\$100,000.00 for Parkway Tree Removal, \$25,000.00 for Storm Clean-up, \$75,000.00 for Parkway Tree Stumping, and \$5,000.00 for Private Property Tree Violation Removals) from this account is proposed to be awarded to A&B Landscaping and Tree Service, Inc. A renewal agreement with another tree pruning and removal contractor is proposed under another agenda item to utilize the remainder of these funds.

Agenda Item Title

A Resolution Approving an Independent Contractor Agreement with A & B Landscaping and Tree Service, Inc. for Village Wide Parkway Tree Removal and Stumping Services for Fiscal Year 2024 in an Amount Not to Exceed \$205,000.00 with an Option to Renew for Two Additional One-Year Terms and Authorizing its Execution

Overview

The Public Works Department is responsible for parkway tree removal and stumping and uses a contractor to assist in these efforts. A & B Landscaping and Tree Service, Inc has previously performed this work for the Village and submitted the low bid for both the removal and stump grinding contracts when a request for bids was issued in August 2023. The Agreement is for one year and provides for two optional one (1) year renewals. Staff recommends approving an agreement with A & B Landscaping and Tree Service, Inc. for FY 2024 parkway tree removal and stumping services.

Recommendation

Adopt the Resolution.

Background

The Village has over 18,000 public trees on parkways and in other public spaces. Each year, a portion of these trees need to be removed and the stumps ground out due to disease (Dutch elm disease), insect infestation (emerald ash borer), storm damage, and senescence. The Village contracts for these services through a year-long contract. Tree removal contractors are also called on to provide emergency services, such as storm damage clean-up and emergency tree removal.

In August 2023, Village staff requested bids for three separate tree maintenance services (pruning, removal, and stumping) under a "Comprehensive Tree Maintenance Bid." A & B Landscaping and Tree Service, Inc. of Riverside, IL is recommended as one of the low responsive bidders for parkway tree removal and stumping services.

Based on past experience over the last several years, staff determined that a single contractor can have difficulty keeping pace with removals and storm damage demands, especially if weather conditions for the season are severe. The Village utilizes multiple contractors for removals to assure trees are removed within a timely manner and goals are met before the end of the contract period.

Staff recommends approval of new agreements with two (2) contractors for parkway tree removal, stump removal, cycle pruning, and emergency services. A & B Landscaping and Tree Service, Inc. has completed this work for the Village in a professional manner and is recommended to continue to provide these services to the Village. The contract for the other contractor, Davis Tree Care and Landscape, Incorporated, is under a separate agenda item.

Fiscal Impact

The proposed Fiscal Year 2024 General Fund budget includes \$125,000.00 to perform parkway tree removal, \$50,000.00 to perform storm clean-up, \$75,000.00 to perform parkway tree stumping, and \$5,000.00 to perform private property tree violation removals within account # 1001-43800-101-530667 (Public Works-Forestry, External Support).

A total of \$205,000.00 (\$100,000.00 for parkway tree removal, \$25,000.00 for storm clean-up, \$75,000.00 for parkway tree stumping, and \$5,000.00 for private property tree violation removals) from this account is proposed to be allocated toward the contract with A & B Landscaping and Tree Service, Inc. A new agreement with another tree pruning and removal contractor is proposed under another agenda item to utilize the remainder of these budgeted funds.

The Village will allow the Contractor to increase or decrease the contract price for each annual renewal. Upon written request from the Contractor, on or before October 20 of each year of this Agreement, the cost of the services provided under the Agreement may be adjusted as follows:

The Contractor shall submit a request for adjustment to the Village based upon the average of the published monthly Index (as defined below) for the period October through September for the previous year. 5. PAYMENT SCHEDULE

Contractor shall, as a condition precedent to its right to receive any payment, submit to the Village an application for payment and such receipts, vouchers, and other documents as may be necessary to establish the Contractor's payment for all labor and material and the absence of any interest whether in the nature of a lien or otherwise of any party in any property, work, or fund with respect to the Work performed hereunder. Such documents shall include, where relevant, the following forms, copies of which are attached hereto:

- (i) Contractor's sworn statement;
- (ii) Contractor's partial or final waiver of lien;
- (iii) Subcontractor's sworn statement(s); and
- (iv) Subcontractor's partial or final waiver of lien.

Payment by the Village shall be conditioned upon an inspection by the Village of the Work completed and submission of required waivers by the Contractor. Payment by the Village shall in no way constitute a waiver of, or relieve the Contractor from, any defects in the work. All payments shall be made in accordance with the Illinois Local Government Prompt Payment Act, 50 ILCS 505/1 *et seq.* Final payment for any Work performed by the Contractor pursuant to an invoice by Contractor shall be made by the Village to the Contractor when Contractor has fully performed the work and the work has been approved by the Village and submission of required waivers and paperwork by Contractor. Approval of the work and issuance of the final payment by the Village shall not constitute a waiver of, or release Contractor from, any defects in the work.

The Village shall have the right to withhold from any payment due hereunder such amount as may reasonably appear necessary to compensate the Village for any actual or prospective loss due to Work which is defective or does not conform to the Contract Documents; damage for which Contractor is liable hereunder; liens or claims of liens; claims of third parties, subcontractors, or material men; or any failure of the Contractor to perform any of its obligations under this Contract. The Village may apply any money withheld or due Contractor hereunder to reimburse itself for any and all costs, expenses, losses, damages, liabilities, suits, judgments, awards, and attorney's fees incurred, suffered, or sustained by the Village and chargeable to Contractor.

6. TERMINATION

The Village may terminate this Contract for cause, which includes but is not necessarily limited to, the Contractor's failure to perform the work pursuant to this Contract. The Village shall provide the Contractor with five (5) days' written notice of a termination for cause pursuant to the provisions of Section 13 below. The Village may also terminate this Contract when it determines the same to be in its best interests by giving fourteen (14) days' written notice to the Contractor pursuant to the provisions of Section 13 below. In such event, the Village shall pay to the Contractor all amounts due for the work performed up to the date of termination.

7. DEFAULT/THE VILLAGE'S REMEDIES.

If it should appear at any time prior to payment for the Work provided pursuant to this Contract that the Contractor has failed or refused to prosecute, and is in default, or has delayed in the prosecution of, the Work to be provided pursuant to this Contract with diligence at a rate that assures completion of the Work in full compliance with the requirements of this Contract, or has attempted to assign this Contract or the Contractor's rights under this Contract, either in whole or in part, or has falsely made any representation or warranty, or has otherwise failed, refused, or delayed to perform or satisfy any other requirement of this Contract or has failed to pay its debts as they come due ("Event of Default"), and has failed to cure, or has reasonably commenced to cure any such Event of Default within fifteen (15) business days after Contractor's receipt of written notice of such Event of Default, then the Village shall have the right, at its election and without prejudice to any other remedies provided by law or equity, to pursue any one or more of the following remedies:

(A) The Village may require Contractor, within such reasonable time as may be fixed by the Village, to complete or correct all or any part of the Work that are defective, damaged, flawed, unsuitable, nonconforming, or incomplete and to take any or all other action necessary to bring Contractor and the Work into compliance with this Contract;

(B) The Village may accept the defective, damaged, flawed, unsuitable, nonconforming, incomplete, or dilatory Work or part thereof and make an equitable reduction;

(C) The Village may terminate this Contract without liability for further payment of amounts due or to become due under this Contract except for amounts due for Services properly performed prior to termination;

(D) The Village may withhold any payment from Contractor, whether or not previously approved, or may recover from Contractor any and all costs, including attorneys' fees and administrative expenses, incurred by the Village as the result of any Event of Default or as a result of actions taken by the Village in response to any Event of Default; or

(E) The Village may recover any damages suffered by the Village as a result of Contractor's Event of Default.

(F) In addition to the above, if Contractor fails to complete any required Work pursuant to this Contract, the Village shall be entitled to liquidated damages in the amount of five hundred dollars (\$500.00) per day for each day the Services remains uncompleted. This amount is not a penalty, and the parties agree to said amount given the difficulties associated with determining or calculating damages to the Village in the event the required Work is not completed on time.

8. COMPLIANCE WITH APPLICABLE LAWS

Contractor shall comply with all applicable laws, regulations, and rules promulgated by any federal, state, county, municipal and/or other governmental unit or regulatory body now in effect during the performance of the work. than the work itself, including the loss of use resulting therefrom, or is attributable to misuse or improper use of trademark or copyright-protected material or otherwise protected intellectual property, to the extent it is caused in whole or in part by any wrongful or negligent act or omission of Contractor, any subcontractor, anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable. Such obligation shall not be construed to negate, abridge or otherwise reduce any other right to indemnity which the Village would otherwise have. The Contractor shall similarly protect, indemnify and hold and save harmless, the Village, its officers, officials, employees, volunteers and agents against and from any and all claims, costs, causes, actions and expenses, including, but not limited to, legal fees incurred by reason of the Contractor's breach of any of its obligations under, or Contractor's default of, any provisions of this Contract. The indemnification obligations under this Section shall not be limited in any way by any limitation on the amount or type of damages, compensation, or benefits payable by or for the Contractor or any subcontractor under workers' compensation or disability benefit acts or employee benefit acts.

10. INSURANCE

The Contractor shall at the Contractor's expense secure and maintain in effect throughout the duration of this Contract, insurance of the following kinds and limits set forth in this Section. The individuals executing this Contract on behalf of Contractor and the Village represent that they have the legal power, right, and actual authority to bind their respective parties to the terms and conditions of this Contract.

15. EFFECTIVE DATE

The effective date of this Contract as reflected above and below shall be the last date of its execution by one of the Parties as set forth below.

16. ENTIRE CONTRACT; APPROVAL OF SUBCONTRACTORS

This Contract, including the documents incorporated by reference herein, sets forth the entire Contract between the parties with respect to the accomplishment of the Work. No right or interest in this Contract shall be assigned, in whole or in part, by either party without the prior written consent of the other party. 17. INDEPENDENT CONTRACTOR

The Contractor shall have the full control of the ways and means of performing the Work referred to above and that the Contractor and its employees, representatives or subcontractors are not employees of the Village, it being specifically agreed that the Contractor bears the relationship of an independent contractor to the Village. The Contract Bond shall become a part of the Contract Documents. The failure of Contractor to supply the required Contract Bond within ten (10) days after the Notice of Award or within such extended period as the Village may grant if the Contract Bond does not meet its approval shall constitute a default, and the Village may either award the

Contract to the next lowest qualified bidder or re-advertise for bids. A charge against Contractor may be made for the difference between the amount of Contractor's Bid and the amount for which a contract for the Work is subsequently executed, irrespective of whether the amount thus due exceeds the amount of the bid guarantee.

19. GOVERNING LAW AND VENUE

This Contract shall be governed by the laws of the State of Illinois both as to interpretation and performance. Venue for any action pursuant to this Contract shall be in the Circuit Court of Cook County, Illinois.

20. AMENDMENTS AND MODIFICATIONS

21. NON-WAIVER OF RIGHTS

No failure of either party to exercise any power given to it hereunder or to insist upon strict compliance by the other party with its obligations hereunder, and no custom or practice of the parties at variance with the terms hereof, nor any payment under this Contract shall constitute a waiver of either party's right to demand exact compliance with the terms hereof.

In the event of the Contractor's noncompliance with any provision of Chapter 13 ("Human Rights") of the Oak Park Village Code, the Illinois Human Rights Act or any other applicable law, the Contractor may be declared non-responsible and therefore ineligible for future Agreements or subcontracts with the Village, and the Agreement may be cancelled or voided in whole or in part, and such other sanctions or penalties may be imposed or remedies invoked as provided by statute or regulation.

Detail Specifications: Village Parkway Tree Cycle Pruning Contract

The Village is seeking bids from qualified arboriculture contractors for the pruning of parkway trees and other Village-owned trees within the Village of Oak Park.

1. Location of Tree Pruning Work

The location of the work is known as: PUBLIC RIGHT-OF-WAY within the Village of Oak Park, Illinois, on right-of-way or on property furnished by the owner. All trees over 1 inch in diameter on inventory sheets supplied to the Contractor in the general area designated on the bid sheet shall be pruned. All tree pruning work is to be done in accordance with the enclosed pruning specifications.

The overall project will be broken up into smaller subsections. Upon completion of a subsection, the contractor will be provided the tree list for the next subsection. This is to allow for better tracking and ensure completion of the project.

It will be the bidder's responsibility to notify and make arrangements with the utility company for the removal of branches extending through power and/or telephone lines so removal operations will not be delayed.

2. Extent of Services

The bidder shall prune all trees designated on pruning sheets and commence work no later than January 2, 2024 (weather dependent). Contractor must be onsite each week and prune a minimum of **300 trees each week for the length of the contract**. All work shall be completed by April 12, 2024, unless the Village's

Director of Public Works grants an extension. Diameter inch estimates per size class are provided on the bid sheet.

3. Project Supervision

The bidder shall designate a project supervisor who will be the primary contact for the contract. This person must be onsite at all times and meet daily with Village representatives and oversee the operations of the crew. This person cannot be a tree worker and must be an International Society of Arboriculture Certified Arborist or Certified Tree Worker.

4. Inspection and Project Meetings

The bidder's project supervisor shall notify the office of the Director of Public Works at the beginning and end of any workday where crews are in Oak Park giving the location of that day's work. The Director of Public Works must also be notified on any work day that crews will not be in Oak Park prior to completion of the project.

The Director of Public Works or his designee will inspect the work daily and will always be available should any problems arise. The project supervisor should expect to meet daily with the Director of Public Works or his designee to discuss the past work completed and upcoming issues.

The Director of Public Works may appoint a consultant to oversee the daily work and progress of this contract. In those cases, all issues related to the contract shall be run through the consultant.

5. Resident Vehicle Parking Issues

It shall be the bidder's responsibility to ensure the proposed work area each day is clear of vehicles. The Village will provide a limited number of "No Parking" signs for the contract, but it will be the responsibility of the bidder to move the signs each day for the next day's work. The bidder will not be permitted to post more blocks than can be accomplished in any one day. Special attention should be paid to areas around schools and multi-unit dwellings to minimize impact to the residents. While the Village has an overnight parking ban, that cannot be relied on to provide clear streets. The Village will not assist the bidder with contacting residents or vehicle relocation if they have not properly posted parking restrictions.

6. Method of Measuring

Trees to be pruned shall be measured per inch of diameter. The diameter shall be measured at a point four feet (4') six inches (6") above the highest ground level at the tree and will be determined by dividing the measured circumference at that point by 3.1416.

7. Pruning Specifications

Objectives: 1) Prune trees to mitigate risk and 2) provide clearance from buildings, allow traffic and pedestrians to pass by the tree unimpeded, and maintain clear lines of sight at intersections and near signs. 3) Additionally, prune trees 10" in diameter or less to develop good structure.

- i. Trees to be pruned in accordance with the latest revisions of both the 1) ANSI A300 Pruning Standards and 2) ISA's Best Management Practices: Pruning.
- ii. Types of Pruning Cuts
 - a. Reduction cuts should only be made to a live lateral branch or codominant stem when it can be expected to sustain the remaining branch or stem. The remaining lateral branch should typically be at least one-third the diameter of the stem or branch being removed. The reduction cut should be made at a slight angle to the remaining branch or codominant stem, without damaging the branch bark ridge and without leaving a stub.
 - b. Branch removal cuts shall be made without cutting into the branch bark ridge or branch collar, or leaving a stub. When a branch collar is not apparent, the branch removal cut shall be made without cutting into the branch bark ridge or, parent stem, and shall not leave a stub.
 - c. Pre-cut all limbs being removed whenever there is a possibility of stripping the bark.
 - d. Flush cuts are not permitted.
 - e. Lions'-tailing and topping are not permitted.
 - f. Chainsaw rash is not permitted
 - g. Hand-held power pruners shall not be used.
- iii. Timing
 - a. No oaks, American elms, or hybrid elm trees will be pruned between April 1 and October 15. These dates are subject to change by the Forestry Superintendent based on current weather conditions.
 - b. Trees 10 inches in diameter and smaller should not be pruned after bud break until approximately July 1 to allow trees to recover from leaf expansion.
- iv. Pruning Requirements
 - a. Prune all trees using a natural system to maintain the natural form and shape of the tree so far as is possible. Appropriate crown reduction methods are preferred where parkway width is sufficient to gain specified clearances, particularly when pruning Tilia species and trees in the 6"-16" size class.

- b. Remove all dead, dying, diseased, interfering, objectionable and weak branches and stubs greater than two inches in diameter from all trees. Remove all sucker growth on the main trunk(s) to the first main crotch.
- c. To avoid misunderstanding, the terms in part "b" above will be used as defined below:
 - 1. "Sucker Growth" - The bushy and undesirable growth of small shoots on the trunk of a tree or in close proximity to the trunk.
 - 2. "Interfering Branches" - Branches which are growing in contact with or within eight (8) feet of signage, manmade structures or overhanging a structure.
 - 3. "Objectionable Branches" - Branches, which are growing in such a manner that, they cause unnecessary crowding, or are undesirable if the natural form and shape of the tree is to be achieved, or are growing in a direction heading into the crown of the tree.
- d. Pruning cuts greater than 4" in diameter shall not be made into live growth without first contacting the Director of Public Works or his designee.
- e. Reduction cuts should be made to a lateral branch that is at least one-third the diameter of the parent stem or branch.
- f. No more than approximately one-fourth of foliage of the tree shall be removed. Removing less live growth is preferred if objectives are met or if the tree appears stressed.
- g. Remove one of two or more crossed and/or rubbing branches greater than 1 inch in diameter from all trees where practical.
- h. All cuts to be made sufficiently close to parent limb, without cutting into the branch collar or leaving a protruding stub, so that closure can readily start under normal conditions. (see ii.b above)
- i. Rope down all branches where damage could be incurred by gouging of a sodded area and/or damage to public walks. Use caution where there is the possibility of damaging adjacent privately-owned shrubs, trees, or flowers.
- j. No person working in trees shall use shoes with spikes or any other footwear, which will, in the Village's opinion, injure the trees while work is being performed. At no time shall any person working in trees for pruning purposes wear spurs or climbing irons.
- k. It will be the Contractor's responsibility to notify and coordinate with the utility company for the removal of branches extending through power and/or telephone lines, so the pruning operations will not be delayed. (duplicate from 1. Location of Tree Pruning Work)

v. Clearance

- a. Lower branches must be raised to a height of allowing a minimum of eight (8) feet of pedestrian access on the sidewalk at the end of a four-year period.
- b. Raise all lower branches and hanging branches to a minimum height of sixteen (16) feet where practical and if possible on trees over 16" in diameter over the street.
- c. Do not unnecessarily raise trees on the sidewalk side to match street clearances.
- d. Upon completion of pruning, there shall be a minimum of 10 feet clearance from house and buildings (including roofs). Situations where this minimum cannot be met without undue harm to the tree need to be approved by the Director of Public Works or his designee.
- e. Clear all streetlight and traffic control devices including non-illuminated signage to allow adequate lighting and sign visibility for the length of the prune cycle. Clear small parkway trees to allow natural growth habit without severely altering the form of the larger tree.

vi. Risk Reporting

- a) Report any structural weakness, decayed trunk or branches, split crotch or branches, or girdling roots within 24 hours of locating to the Director of Public Works or his designee.

vii. The following only applies trees that are 1-10" in diameter.

- a) **Objective: To achieve a strong central leader along with a strong scaffold branch structure. This is best accomplished using a top-down method.**
- b) Remove or subordinate super-dominant branches (50% or more of the diameter of the parent stem) with reduction cuts.
- c) Prune for central leader by removing or subordinating co-dominant stems with reduction cuts.
- d) Prune to remove or subordinate v-crotches with reduction cuts to avoid these attachments from developing included bark in the future.
- e) Identify lowest permanent scaffold branch and prune to expose it to full sun and to eliminate competition. To avoid removing excessive foliage, reduction cuts may be needed to subordinate temporary branches to slow their growth rate.
- f) Potential scaffold branches should be:
 - a. Vertically spaced 18-24" apart. Scaffold branches to remain on mature tree should be spaced at 3 feet if growing above one another.

- b. Only one scaffold branch should remain per node (point of attachment).
- c. Scaffold branches should alternate around the trunk of the tree and not only be located directly above each other.
- d. Scaffold branches should be no more than $\frac{1}{2}$ the diameter of the trunk immediately above the branch.
- e. Retain lateral branches along limbs, but each should be less than $\frac{1}{2}$ the diameter of the limb at attachment. At least $\frac{1}{2}$ of the foliage should be on branches (temporary and permanent) arising in the lower $\frac{2}{3}$ of the tree. Similarly, branches should have like distribution of foliage along their length (lion's-tailing will not be permitted).
- g) Limb up temporary branches from the bottom $\frac{1}{3}$ of the tree.
- h) Subordinate or remove branches that interfere with pedestrian or vehicular traffic. Only remove the part that interferes and be conservative.
- i) Remove dead or broken branches from the upper canopy and water sprouts or suckers from the roots and trunk.
- j) Do not remove more than $\frac{1}{4}$ of the leaf area of the tree or create a live crown ratio of less than $\frac{2}{3}$ of the tree (Figure 1). If more pruning is necessary, contact the Director of Public Works or his designee prior to any additional work.
- k) If the above pruning will not be possible for a given tree contact the Director of Public Works or his designee

Figure 1. Acceptable and unacceptable live crown ratios for younger parkway trees ($\leq 10"$ DBH) at the completion of structure pruning.

8. Cleanup

Immediately after pruning of a tree has been completed, the area beneath the tree shall be cleared and all debris shall be removed from the area. All streets, driveways, and sidewalks shall be cleared. Care shall also be taken not to damage other trees, shrubs, or lawns during tree pruning operations.

9. Removal of Debris

All debris from tree pruning operations shall be removed from the site and from the Village of Oak Park the same business day debris has been created, unless authorized by Director of Public Works or his designee. No onsite or Village owned areas will be designated as debris storage areas. Payment for removal and disposal of debris is to be included in the unit price.

Under no circumstances shall debris be left on the parkway or street over weekends or holidays. In addition, keeping debris off the street and parkway areas and out of the gutters prevents the debris from entering and plugging the sewer system. Environmentally accepted practices of debris disposal are also an important part of this work.

10. Arborist Certification

There shall be at least one "Certified Arborist" or "Certified Tree Worker" as recognized by the International Society of Arboriculture on the job site **at all times**. If the project supervisor is not onsite at all times another staff member must be a "Certified Arborist" or "Certified Tree Worker". They must have the authority to direct the work onsite. They must be able to speak articulately to residents and Village staff about the work occurring onsite. This person cannot be functioning as

a supervisor and tree worker at the same time (per item 3 – Project Supervision above).

The bidder is responsible for keeping the Village updated on its work on a weekly basis. The Village requires that the bidder provide a proposed and actual work schedule for each week of the contract. These records must be turned into the Director of Public Works office, emailed, or faxed each Monday. The report will include the proposed work to be completed in the village for the week and an actual work completed report, including the specific days individual trees were pruned for the previous week.

The Director of Public Works or his designee will review the completed work and provide a punch list for trees and locations that have not met the specifications of the contract. The bidder will not be paid for an invoice including those locations until the associated punch list items have been addressed and confirmed complete.

12. "On Call" Emergency Work

The bidder is required to provide On Call Emergency work and equipment as necessary. Failure to respond or provide the requested equipment and services may be considered a breach of contract.

a. Contact

The bidder is required to provide a twenty-four (24) hour contact number for the Village to request emergency services.

b. Response Time

In case of emergency, the bidder is required to provide the requested equipment and staff to the Village within two (2) hours of a call out.

No on-site or Village-owned areas will be designated as log storage areas. Payment for removal and disposal of debris is to be included in the unit price.

Under no circumstances shall debris be left on the parkway or street over weekends or holidays. In addition, keeping debris off the street and parkway areas and out of the gutters prevents the debris from entering and plugging the sewer system. Environmentally accepted practices of debris disposal are also an important part of this work.

10. Method of Measuring

Trees to be removed shall be measured per inch of diameter. The diameter shall be measured at a point four feet (4') six inches (6") above the highest ground level at the tree and will be determined by dividing the measured circumference at that point by 3.1416.

11. Reporting

The bidder is responsible for keeping the Village updated on its work on a weekly basis. The Village requires that the bidder provide a proposed and actual work schedule for each week of the contract. These records must be turned into the Director of Public Works office, emailed, or faxed each Monday. The report will include the proposed work to be completed in the village for the week and an actual work completed report for the previous week.

12. "On Call" Emergency Work

The bidder is required to provide On Call Emergency work and equipment as necessary. Failure to respond or provide the requested equipment and services may be considered a breach of contract.

d. Contact

The bidder is required to provide a twenty-four (24) hour contact number for the Village to request emergency services.

e. Response Time

In case of emergency, the bidder is required to provide the requested equipment and staff to the Village within two (2) hours of a call out.

f. Contractor Release

The bidder shall not pull work crews from town without the approval of the Director of Public Works. Early release of crews may be considered a breach of contract.

All stump removal work shall be done in a safe manner and bidder is required to follow the latest ANSI Z133 standards for Arboriculture Operations.

1. **Extent of Services**

Two separate stump removal and restoration periods are designated – **Spring** (April 1 through June 15), and **Fall** (September 1 through November 30).

2. **Location of Tree Stump Removal Work**

The location of the work is known as: PUBLIC RIGHT-OF-WAY within the Village of Oak Park, Illinois, on right-of-way or on property furnished by the owner. All stumps in the Village parkway on the streets in the general area shall be removed. All stump removal and restoration work is to be done in accordance with the enclosed removal specifications.

3. **Commencement of Work**

The bidder shall remove and restore all stumps designated as “Spring Period Stumps” within time frame specified for those removals, April 1 through June 15, unless the Director of Public Works or his designee grants an extension. Total number of stump removals is estimated at 100 stumps for this period.

All stumps designated as “Fall Period Stumps” shall be removed within the time frame specified for those removals, September 1 through November 15. Total number of stump removals is estimated at 100 stumps for this period.

4. **Stump Removal**

In an effort to facilitate future planting in the parkway, the contractor shall remove all tree stumps and buttress roots designated by the Director of Public Works completely or to a depth of twenty-four inches (24”) below the adjacent ground level. Additionally, the contractor shall remove all surface and adjacent subsurface roots as may be necessary to allow for planting directly in or adjacent to the stumping site and remove any additional turf or soil to eliminate “humps” or mounds in the parkway. All parkway areas are to be left flat and meet original grade and pitch from sidewalk to curb.

5. **Site Appearance and Disposal of Stump Grindings**

After grinding (removal) of a tree stump and all associated roots, the Contractor shall remove all stump grindings and associated debris from the site with appropriate tools and equipment for the job. Stumps, grindings, and debris shall be placed away from the curb and gutter, street, sidewalk, and private property immediately to eliminate hazards to vehicular and pedestrian traffic, and to eliminate damage to private property. The contractor shall clean up the site and remove all grindings and debris within twenty-four (24) hours of grinding. All streets, driveways, and sidewalks shall be swept clean. Care shall also be taken not to damage other trees, shrubs, or lawns during tree stump removal.

operations. The bidder shall leave a barricade or cone in every cleaned hole until the location is backfilled.

Grinding debris generated by the work described in this contract shall be the responsibility of the contractor. Payment for removal and disposal of debris is to be included in the unit price. Environmentally accepted practices of debris disposal are also an important part of this work.

6. Backfilling

All areas where stumps have been removed and areas disturbed by the removal operation shall be backfilled and compacted to the level of the adjoining grade with pulverized black dirt (topsoil). This shall occur after the Director of Public Works or his designee confirms the stump grinding and cleaning has been done in a manner satisfactory to the contract. All holes must be backfilled within two business days of approval of Village staff. The Contractor shall supply his own topsoil. The topsoil shall be properly leveled and compacted so as to ensure a minimum of settlement of the backfill material. Grindings (chips) and debris must not be used as backfill material.

7. Seeding

All adjacent disturbed areas and areas where backfill material was installed shall be seeded. Seed shall be a mixture composed of fifty (50%) percent Kentucky Bluegrass, thirty (30%) thirty percent Perennial Rye Grass, and twenty (20%) percent Creeping Red Fescue or other mix approved by the Director of Public Works or his designee

8. Stumping Oversight by the Village

The Village will provide the contractor with lists of approximately 30 stumps for completion the next business week. All stump grinding and cleaning associated with the work list must be completed within the first two (2) business days of the week (weather dependent). Within one (1) business day of confirmation from the bidder that work has been completed, the Director of Public Works or his designee will inspect the locations and verify they meet the specifications of the contract. The bidder will be notified of locations that are found to be insufficiently ground, cleaned, or leveled. Sites must be corrected at no additional cost to the Village. Once the bidder receives confirmation of approved sites they will have 2 business days to backfill and seed the locations. Once the list has been completed and verified by Village staff a new list will be generated. This process will repeat until the planned stump removals for the period are complete.

9. Notification to the Resident

Upon backfilling and seeding a location the bidder shall leave a notice to the adjacent property owner regarding the completion of the work and the necessary watering. This notice will be provided by the Village and will be either a door hanger or a post-it note to attach to the front door or window.

10. J.U.L.I.E.

The Contractor is responsible for any damage done to underground utilities while working in the parkway. The Contractor will submit the stump list to J.U.L.I.E. to be located prior to stump removal. The Contractor must submit the list to J.U.L.I.E. no more than three (3) working days after receipt from the Village. The Contractor must otherwise comply with all J.U.L.I.E. requirements.

11. Sucker Growth

In the event that adventitious (sucker) growth should occur, the contractor shall be responsible for regrinding to eliminate sucker growth during a period of one year after initial grinding. Re-grinds must also be restored to grade and reseeded at no additional charge to the Village. Care shall also be taken not to damage other trees, shrubs, or lawns during stump removal and restoration operations.

12. Method of Measuring

Stump removal shall be done on a flat rate, "per stump" basis.

13. Reporting

The bidder is responsible for keeping the Village updated on its work. The Village requires that the bidder provide immediate notice upon completing grinding and cleaning for inspection. The bidder must also alert the Village to completion of a list for inspection and assignment of additional stumps.

14. Add On Parkway Restoration

The bidder shall provide pricing for parkway restoration work. In some instances, the parkway may be so disturbed or changed as a result of the parkway tree or the tree removal process that entire restoration with the installation of sod may be called for. These locations will be identified by the Village and the total square yardage of the proposed restoration will be determined. The bidder will be required to remove any additional material or bring in additional top soil to restore the original grade of the parkway between the sidewalk and the curb for the length determined by the Village. The bidder will then install sod at the location. Pricing will be based on a square yard price for sod installation. All additional work, not including the parkway tree stumping is incidental to the sod price. If stumping is required at one of these locations it will be paid at the regular contract rate in addition to the square yard sod installation price.

All designated trees in the parks shall be removed and the stumps ground to a minimum four to eight inches (4-8") below grade. All tree removal work is to be done in accordance with the enclosed removal specifications.

2. Method of Measuring

Trees to be removed shall be measured per inch of diameter. The diameter shall be measured at a point four feet (4') six inches (6") above the highest ground level at the tree and will be determined by dividing the measured circumference at that point by 3.1416.

3. Commencement of Work

5. Removal of Stumps and Debris

All stumps shall be ground to a depth of four (4) to eight (8) inches below grade. No on site or Park District owned areas will be designated as log storage areas. Payment for removal and disposal of debris is to be included in the unit price. Additionally, no debris or logs shall be given to residents since they may harbor the Emerald Ash Borer. Under no circumstances shall debris be left on the parks over weekends or holidays. In addition, keeping debris off street and parkway areas and out of the gutters prevents the debris from entering and plugging the sewer system. Environmentally accepted practices of debris disposal are also an important part of this work.

Pruning

Location of Tree Pruning Work

1. The location of the work is known as: Park District of Oak Park, Illinois. Specific sites within the Park District are:

- | | |
|------------------|----------------------|
| A) Barrie Park: | 1000/1011 S. Lombard |
| B) Carroll Park: | 1125 S. Kenilworth |
| C) Euclid Park: | 705 W. Fillmore |
| D) Maple Park: | 1105 S. Maple |
| E) Rehm Park: | 515 Garfield |

Additional requests for pruning of specific tree(s) may be made (see non-emergency pricing)

All trees over 10 inches in diameter in the designated parks shall be pruned. All tree pruning work is to be done in accordance with the enclosed pruning specifications

It will be the bidder's responsibility to notify and make arrangements with the utility company for the removal of branches extending through power and/or telephone lines so removal operations will not be delayed.

The bidder shall protect sidewalks, curbs, streets, manhole covers and catch basins, housing property and automobiles from the impact of falling wood by the use of limb ground supports when needed.

2. All trees to be trimmed in accordance with the revised Pruning Standard for Shade Trees, latest edition, ANSI A300 (1995) pruning standards. Prune all trees so the natural form and shape of the tree is achieved so far as is possible. In the case of American Elms, prune trees so a "cathedral arch" effect is achieved. Crown reduction method preferred, particularly when pruning *Tilia* species and trees in the 8"-16" size class, with no more than one quarter of leaf surface to be removed. Balance tree evenly. Lower branches must be raised to a height of allowing 8 feet for pedestrian access.
3. For trees 8"-16" in diameter:
 - Prune for central leader (if possible) by removing or subordinating co-dominant stems with drop-crotch cuts.
 - Prune for scaffold limb selection. Thinning or subordinating cuts may need to be made to these branches to slow their growth rate.
 - Potential scaffold branches should be vertically spaced 18" apart. Scaffold branches to remain on mature tree should be spaced at 3 feet if growing above one another.
 - Scaffold branches should be no more than ½ the diameter of the trunk immediately above the branch
 - Retain lateral branches along limbs, but each should be less than ½ the diameter of the limb at attachment.
 - At least ½ of the foliage should be on branches (temporary and permanent) arising in the lower 2/3 of the tree. Similarly, branches should have like distribution of foliage along their length.
4. Raise all lower branches and hanging branches to a minimum height of 16 feet where practical on trees over 16" in diameter. Not more than one-fourth of foliage of **mature** trees to be removed.
5. Contractor responsible for re-prunes for a period of one year after completion of pruning section. Remove all sucker growth on the main trunk(s) to first main crotch. Remove all dead, dying, diseased, interfering, objectionable and weak branches and stubs greater than two inches in diameter from all trees.
6. Remove one of two or more crossed and/or rubbing branches greater than 2 inches in diameter from all trees where practical.
7. All cuts to be made sufficiently close to parent limb, without cutting into the branch collar or leaving a protruding stub, so that closure can readily start under normal conditions.
8. Rope down all branches where damage could be incurred by gouging of a sodded area and/or damage to public walks. Use caution where there is the possibility of damaging adjacent shrubs, trees, or flowers.

9. Pre-cut all limbs being removed whenever there is a possibility of stripping the bark.
10. Report any structural weakness, decayed trunk or branches, split crotch or branches, or girdling roots within 24 hours of locating to the Grounds Maintenance Supervisor.
11. No person working in trees shall use shoes with spikes or any other footwear, which will, in the Park District's opinion, injure the trees while work is being performed. At no time shall any person working in trees for pruning purposes wear spurs or climbing irons.
12. Upon completion of pruning, there shall be a minimum of 10 feet clearance from play equipment and buildings (including roofs).

To avoid misunderstanding, the terms in part 5 above will be used as defined below:

- A. "Sucker Growth" - The bushy and undesirable growth of small shoots on the trunk of a tree or in close proximity to the trunk.
- B. "Interfering Branches" - Branches which are growing in contact with or within (15) feet of signage, manmade structures or overhanging a structure.
- C. "Objectionable Branches" - Branches, which are growing in such a manner that, they cause unnecessary crowding, or are undesirable if the natural form and shape of the tree is to be achieved, or are growing in a direction heading into the crown of the tree.

It will be the Contractor's responsibility to notify and make arrangements with the utility company for the removal of branches extending through power and/or telephone lines, so the pruning operations will not be delayed.

The Contractor shall protect sidewalks, curbs, streets, manhole covers and catch basin, housing property and automobiles from the impact of falling wood by the use of limb ground supports when needed.
