**Village of Oak Park
Water & Sewer Capital Project Sheet
2025 - 2029**

Project: Advanced Metering Infrastructure (AMI) General Priority Code: A General Category: Machinery and Equipment

Climate Priority Code: Low Impact Area(s): Public Health; Extreme Weather & Resiliency

Description:
An Advanced Metering Infrastructure (AMI), also known as a Fixed Network, is defined as a metering system that records customer water consumption hourly or more frequently. This network provides for daily or more frequent transmittal of water measurements over a communication network to a central collection point. This project includes the installation of the AMI network (\$440,297) and a customer portal similar to the "Water Smart" Customer Web Portal (\$55,000).

Justification:
Many water utilities are migrating to AMI technology to gain the benefits of the advanced data stream. AMI provides increased customer service regarding water meter performance and near real-time data at the touch of your fingers. Data collection process will be increased by the ability to access Village wide readings from a single location. Reporting will also be improved to assist with management and planning. Customers will also have the ability to personally monitor their water meter and even receive emails due to leaks detected. This Network will allow the Village to see real time water loss or non-revenue water. This project is in alignment with the Village Climate Ready Oak Park Plan Goal: DW03 - Reduce Non-Revenue Water Loss.

Current Status:
In 2023 the installation of the AMI system began with five Gateways but delays on the AMI equipment resulted in the remaining money to be carried forward to 2024. Currently, staff is in the process of installing the AMI Network and is expected additional gateways needed to be installed in 2025. Additional Gateways have been ordered but lead time is delivery in 2025. Proposed funding in 2025 would support the development of a web portal to provide the Village and residents with easy access to meter usage data and provide for any additional gateways needed to maximize coverage and completion of AMI Network.
