# GIS Program Accomplishments of 2018 and Planned Items for 2019

This year, the Village's GIS program – which is staffed by Municipal GIS Partners, Inc. – completed several projects in collaboration with community staff. MGP aims to always be focused on projects that are most important to the strategic goals of the community. Below are some examples of completed projects as well as upcoming projects for 2019.

Accomplished in 2018

| Department | Project Name | Description |
|---|---|---|
| Development Customer Services | Incorporate Unit Addresses in GIS | Analyzed multiple systems and sources and added all known unit addresses into GIS to support all Village decisions and processes |
| Public Works | Asset Management Rollout | Implemented Asset Management solution, allowing the community staff to collect, manage, and track data to make more informed decisions. |
| Police | CAD and RMS incident locations in MapOffice | Visualized CAD and RMS incident locations in MapOffice and trained Police Department to access the data |

Planned for 2019

| Department | Project Name | Description |
|---|---|---|
| Police | Video Camera Registration | Integrate street and address data to power video registration workflows map locations of registered locations |
| Finance and Public Works | Permit and Finance software data in Community-Portal | Incorporate Permit and Licensing system data in Community-Portal to give staff the ability to easily compare and visualize the data |
| Fire | Fire Pre-Plans Access | Implement a solution to give staff the ability to view Fire Pre-Plan data in the field |
