Hi Jeff,

I'm working on the contract renewal for the pruning contract.

The section below is in the contract and allows for an adjustment to the contract price based on the consumer price index (CPI). The CPI for the period below is 3.4%. If you would like to increase your prices for next year by this amount, please send me a new email requesting this increase. I'll include it with the contract renewal documents. Thanks!

Grant

The Village or Park District will have the right to renew the contract for two (2) additional one-year terms with all terms and conditions, other than price, remaining the same. The Village or Park District will allow the Bidder to increase or decrease the contract price for each annual renewal.

Upon written request from the Bidder, on or before October 20 of each year of the Agreement, the cost of the services provided under the Agreement may be adjusted as follows:

The contractor shall submit a request for adjustment to the Village or Park District based upon the average of the published monthly Index (as defined below) for the period October through September for the previous year. The Index shall be the United States Department of Labor, Bureau of Labor Chicago Statistics, Revised Consumer Price Index for all Urban Wage Earners for Chicago-Naperville-Elgin, IL-IN-WI (all items, 1982-84 = 100).

Notwithstanding anything contained in this Request for Bids to the contrary, an annual adjustment shall not be greater than five percent (5.0%) of the previous year's cost for services provided under this Agreement in any year.

Any applicable adjustment shall take effect on January 1st.

# Agenda Item Summary

#### **Submitted By**

Rob Sproule, Public Works Director

#### **Reviewed By**

A.M. Zayyad, Deputy Village Manager

#### **Agenda Item Title**

A Resolution Approving the Renewal of the Independent Contractor Agreement with Davis Tree Care and Landscape, Incorporated for Village Wide Parkway Tree Pruning and Removal Services in an Amount not to Exceed \$460,000.00 and Authorizing its Execution

#### Overview

The Public Works Department is responsible for Parkway Tree Pruning and Removal. To assist in this effort, a contractor is utilized. Davis Tree Care and Landscape, Incorporated performed this work over the past year following a competitive bidding process. The Agreement provides for two possible one (1) year renewals. It is proposed to exercise the first of the two possible renewals with Davis Tree Care and Landscape, Incorporated for Fiscal Year 2025 Parkway Tree Pruning and Removal Services.

#### Recommendation

Adopt the Resolution.

#### Background

The Village has over 18,000 public trees on parkways and in other public spaces. The Village has utilized contractors to help prune a portion of these trees annually. Previously, the Village maintained a three-year pruning cycle where one-third of all Village-owned trees are pruned each year by a contractor. All trees within a specified geographical area are pruned in a single season.

When the pruning contract was bid in August 2023, Davis Tree Care and Landscaping, Incorporated was the lower bidder; however, their price had increased by 90% since this work was last bid in 2020. To manage this increase in the 2025 budget, we are proposing a reduction in service. In 2025, contracted pruning work will include all parkway trees 1) south of I-290 and 2) between I-290 and Madison Avenue and west of S East Ave. This would put the Village on a four-year pruning cycle where 1/4 of the Village's trees are pruned annually.

In addition, each year a portion of those trees need to be removed due to disease (Dutch elm disease), insect infestation (Emerald ash borer), storm damage, and senescence. The Village contracts for these services through a year-long contract. Tree removal contractors are also called on to provide emergency services such as storm damage clean-up and emergency tree removal.

Experience over the last several years has determined that a single contractor can have difficulty keeping pace

#### File #: RES 24-353, Version: 1

with removals and storm damage demands, especially if weather conditions for the season are severe. The Village contracts with multiple contractors for removals to ensure trees are removed within a timely manner and meet goals before the end of the contract period.

In August 2023 Village staff requested bids for three separate tree maintenance services (pruning, removal, and stumping) under a "Comprehensive Tree Maintenance Bid". Davis Tree Care and Landscape, Incorporated of Forest Park, IL is recommended as one of the low-responsive bidders for Parkway Tree Pruning and Removal Services.

Staff recommend renewing the agreement with our two current contractors for parkway tree removal, stump removal, cycle pruning, and emergency services. Davis Tree Care and Landscape, Incorporated has completed this work for the Village in a professional manner and is recommended to continue to provide the Village with this service. The contract for the other contractor, A & B Landscaping and Tree Service, Inc., is under a separate agenda item.

#### **Fiscal Impact**

The proposed Fiscal Year 2025 General Fund budget includes \$125,000.00 to perform Parkway Tree Removal, \$50,000.00 to perform Storm Clean-up, and \$410,000.00 to perform Parkway Tree Pruning in the General Fund, Forestry Division External Support account no., 1001-43800-101-530667.

A total of \$460,000.00 (\$410,000.00 for Parkway Tree Pruning, \$25,000.00 for Parkway Tree Removal, and \$25,000.00 for Storm Clean-up) from this account is proposed to be awarded to Davis Tree Care and Landscape, Incorporated. A new agreement with another tree removal and stumping contractor is proposed under another agenda item to utilize the remainder of these funds.

A Resolution Approving an Independent Contractor Agreement with Davis Tree Care and Landscape, Incorporated for Village Wide Parkway Tree Pruning and Removal Services for Fiscal Year 2024 in an Amount Not to Exceed \$450,000.00 with an Option to Renew for Two Additional One-Year Terms and Authorizing its Execution

#### Overview

The Public Works Department is responsible for parkway tree pruning and removal and uses a contractor to assist in these efforts. Davis Tree Care and Landscape, Incorporated has previously performed this work for the Village and submitted the low bid for this work when a request for bids was issued in August 2023. The Agreement is for one year and provides for two optional one (1) year renewals. Staff recommends approving an agreement with Davis Tree Care and Landscape, Incorporated for FY 2024 parkway tree pruning and removal services.

#### Recommendation

Adopt the Resolution.

#### Background

The Village has over 18,000 public trees on parkways and in other public spaces. The Village has utilized contractors to help prune a portion of these trees annually. Previously, the Village maintained a three (3) year pruning cycle where one-third (1/3) of all village-owned trees are pruned each year. All trees within a specified geographical area are pruned by the contractor in a single season.

When a request for bids was issued in August 2023, Davis Tree Care and Landscaping, Incorporated was a low bidder; however, their price had increased by 90% since this work was last bid in 2020. To manage this increase in the 2024 budget, we are proposing a reduction in service. Staff's goal for FY 2024 is for the contractor to prune all parkway trees between Chicago Avenue and Division Street. This would put the Village on a six (6) year pruning cycle, where 1/6 of the Village's trees are pruned annually. If the contractor finishes and time allows they will also prune additional trees in the area north of Division Street. This would put the Village on a four (4) year pruning cycle where 1/4 of the Villages trees would be pruned annually. Staff plans to internally review the current cycle pruning program and may present a new program for 2025.

In addition, each year a portion of those trees need to be removed due to disease (Dutch elm disease), insect

#### File #: RES 23-350, Version: 1

infestation (Emerald ash borer), storm damage and senescence. The Village contracts for these services through a year-long contract. Tree removal contractors are also called on to provide emergency services such as storm damage clean-up and emergency tree removal.

Based on past experience over the last several years, staff determined that a single contractor can have difficulty keeping pace with tree removals and storm damage demands, especially if weather conditions for the season are severe. The Village utilizes multiple contractors for removals to assure trees are removed within a timely manner and goals are met before the end of the contract period.

In August 2023, Village staff requested bids for three (3) separate tree maintenance services (pruning, removal, and stumping) under a "Comprehensive Tree Maintenance Bid." Davis Tree Care and Landscape, Incorporated of Forest Park, IL is recommended as one of the low responsive bidders for Parkway Tree Pruning and Removal Services.

Staff recommends approval of the new agreement with two (2) contractors for parkway tree removal, stump removal, cycle pruning and emergency services. Davis Tree Care and Landscape, Incorporated has completed this work for the Village in a professional manner and is recommended to continue to provide these services to the Village. A new agreement with another contractor is proposed under another agenda item to perform the remainder of these services.

#### **Fiscal Impact**

The proposed Fiscal Year 2024 General Fund budget includes \$125,000.00 to perform parkway tree removal, \$50,000.00 to perform storm cleanup, and \$400,000.00 to perform parkway tree pruning within account # 1001-43800-101-530667 (Public Works-Forestry, External Support).

A total of \$450,000.00 (\$400,000.00 for parkway tree pruning, \$25,000.00 for parkway tree removal, and \$25,000.00 for storm cleanup) from this account is proposed to be allocated toward the contract with Davis Tree Care and Landscape, Incorporated. A new agreement with another contractor is proposed under another agenda item to utilize the remainder of these budgeted funds.

The Village will have the right to renew this Contract for two (2) additional one (1) year terms with all terms and conditions, other than price, remaining the same. The Village will allow the Contractor to increase or decrease the contract price for each annual renewal. Upon written request from the Contractor, on or before October 20 of each year of this Agreement, the cost of the services provided under the Agreement may be adjusted as follows:

Approval of the work and issuance of the final payment by the Village shall not constitute a waiver of, or release Contractor from, any defects in the work.

The Village shall have the right to withhold from any payment due hereunder such amount as may reasonably appear necessary to compensate the Village for any actual or prospective loss due to Work which is defective or does not conform to the Contract Documents; damage for which Contractor is liable hereunder; liens or claims of liens; claims of third parties, subcontractors, or material men; or any failure of the Contractor to perform any of its obligations under this Contract. In such event, the Village shall pay to the Contractor all amounts due for the work performed up to the date of termination.

#### 7. DEFAULT/THE VILLAGE'S REMEDIES.

If it should appear at any time prior to payment for the Work provided pursuant to this Contract that the Contractor has failed or refused to prosecute, and is in default, or has delayed in the prosecution of, the Work to be provided pursuant to this Contract with diligence at a rate that assures completion of the Work in full compliance with the requirements of this Contract, or has attempted to assign this Contract or the Contractor's rights under this Contract, either in whole or in part, or has falsely made any representation or warranty, or has otherwise failed, refused, or delayed to perform or satisfy any other requirement of this Contract or has failed to pay its debts as they come due ("Event of Default"), and has failed to cure, or has reasonably commenced to cure any such Event of Default within fifteen (15) business days after Contractor's receipt of written notice of such Event of Default, then the Village shall have the right, at its election and without prejudice to any other remedies provided by law or equity, to pursue any one or more of the following remedies:

- (E) The Village may recover any damages suffered by the Village as a result of Contractor's Event of Default.

Such obligation shall not be construed to negate, abridge or otherwise reduce any other right to indemnity which the Village would otherwise have. The Contractor shall similarly protect, indemnify and hold and save harmless, the Village, its officers, officials, employees, volunteers and agents against and from any and all claims, costs, causes, actions and expenses, including, but not limited to, legal fees incurred by reason of the Contractor's breach of any of its obligations under, or Contractor's default of, any provisions of this Contract. All trees over 1 inch in diameter on inventory sheets supplied to the Contractor in the general area designated on the bid sheet shall be pruned. All tree pruning work is to be done in accordance with the enclosed pruning specifications.

# 2. Extent of Services

The bidder shall prune all trees designated on pruning sheets and commence work no later than January 2, 2024 (weather dependent). Contractor must be onsite each week and prune a minimum of 300 trees each week for the length of the contract. All work shall be completed by April 12, 2024, unless the Village's

The Village will not assist the bidder with contacting residents or vehicle relocation if they have not properly posted parking restrictions.

Trees to be pruned shall be measured per inch of diameter. The diameter shall be measured at a point four feet (4') six inches (6") above the highest ground level at the tree and will be determined by dividing the measured circumference at that point by 3.1416.

13

#### 7. Pruning Specifications

Objectives: 1) Prune trees to mitigate risk and 2) provide clearance from buildings, allow traffic and pedestrians to pass by the tree unimpeded, and maintain clear lines of site at intersections and near signs. 3) Additionally, prune trees 10" in diameter or less to develop good structure.

Trees to be pruned in accordance with the latest revisions of both the 1)
 ANSI A300 Pruning Standards and 2) ISA's Best Management Practices:
 Pruning.

#### ii. Types of Pruning Cuts

- a. Reduction cuts should only be made to a live lateral branch or codominant stem when it can be expected to sustain the remaining branch or stem. The remaining lateral branch should typically be at least one-third the diameter of the stem or branch being removed. The reduction cut should be made at a slight angle to the remaining branch or codominant stem, without damaging the branch bark ridge and without leaving a stub.
- b. Branch removal cuts shall be made without cutting into the branch bark ridge or branch collar, or leaving a stub. When a branch collar is not apparent, the branch removal cut shall be made without cutting into the branch bark ridge or, parent stem, and shall not leave a stub.
- c. Pre-cut all limbs being removed whenever there is a possibility of stripping the bark.
- d. Flush cuts are not permitted.
- e. Lions'-tailing and topping are not permitted.
- f. Chainsaw rash is not permitted
- g. Hand-held power pruners shall not be used.

#### iii. Timing

a. No oaks, American elms, or hybrid elm trees will be pruned between April 1 and October 15. These dates are subject to change by the Forestry Superintendent based on current weather conditions.

b. Trees 10 inches in diameter and smaller should not be pruned after bud break until approximately July 1 to allow trees to recover from leaf expansion.

#### iv. Pruning Requirements

a. Prune all trees using a natural system to maintain the natural form and shape of the tree so far as is possible. Appropriate crown reduction methods are preferred where parkway width is sufficient to gain specified clearances, particularly when pruning <u>Tilia</u> species and trees in the 6"-16" size class.

- b. Remove all dead, dying, diseased, interfering, objectionable and weak branches and stubs greater than two inches in diameter from all trees. Remove all sucker growth on the main trunk(s) to the first main crotch.
- c. To avoid misunderstanding, the terms in part "b" above will be used as defined below:
  - "Sucker Growth" The bushy and undesirable growth of small shoots on the trunk of a tree or in close proximity to the trunk.
  - 2. "Interfering Branches" Branches which are growing in contact with or within eight (8) feet of signage, manmade structures or overhanging a structure.
  - 3. "Objectionable Branches" Branches, which are growing in such a manner that, they cause unnecessary crowding, or are undesirable if the natural form and shape of the tree is to be achieved, or are growing in a direction heading into the crown of the tree.
- d. Pruning cuts greater than 4" in diameter shall not be made into live growth without first contacting the Director of Public Works or his designee.
- e. Reduction cuts should be made to a lateral branch that is at least one-third the diameter of the parent stem or branch.
- f. No more than approximately one-fourth of foliage of the tree shall be removed. Removing less live growth is preferred if objectives are met or if the tree appears stressed.
- g. Remove one of two or more crossed and/or rubbing branches greater than 1 inch in diameter from all trees where practical.
- h. All cuts to be made sufficiently close to parent limb, without cutting into the branch collar or leaving a protruding stub, so that closure can readily start under normal conditions. (see ii.b above)
- Rope down all branches where damage could be incurred by gouging of a sodded area and/or damage to public walks. Use caution where there is the possibility of damaging adjacent privately-owned shrubs, trees, or flowers.
- j. No person working in trees shall use shoes with spikes or any other footwear, which will, in the Village's opinion, injure the trees while work is being performed. At no time shall any person working in trees for pruning purposes wear spurs or climbing irons.
- k. It will be the Contractor's responsibility to notify and coordinate with the utility company for the removal of branches extending through power and/or telephone lines, so the pruning operations will not be delayed. (duplicate from 1. Location of Tree Pruning Work)

#### v. Clearance

- a. Lower branches must be raised to a height of allowing a minimum of eight (8) feet of pedestrian access on the sidewalk at the end of a four-year period.
- b. Raise all lower branches and hanging branches to a minimum height of sixteen (16) feet where practical and if possible on trees over 16" in diameter over the street.
- c. Do not unnecessarily raise trees on the sidewalk side to match street clearances.
- d. Upon completion of pruning, there shall be a minimum of 10 feet clearance from house and buildings (including roofs). Situations where this minimum cannot be met without undue harm to the tree need to be approved by the Director of Public Works or his designee.
- e. Clear all streetlight and traffic control devices including nonilluminated signage to allow adequate lighting and sign visibility for the length of the prune cycle. Clear small parkway trees to allow natural growth habit without severely altering the form of the larger tree.

# Vi.

#### vi. Risk Reporting

a) Report any structural weakness, decayed trunk or branches, split crotch or branches, or girdling roots within 24 hours of locating to the Director of Public Works or his designee.

vii. The following only applies trees that are 1-10" in diameter.

- a) Objective: To achieve a strong central leader along with a strong scaffold branch structure. This is best accomplished using a topdown method.
- b) Remove or subordinate super-dominant branches (50% or more of the diameter of the parent stem) with reduction cuts.
- c) Prune for central leader by removing or subordinating co-dominant stems with reduction cuts.
- d) Prune to remove or subordinate v-crotches with reduction cuts to avoid these attachments from developing included bark in the future
- e) Identify lowest permanent scaffold branch and prune to expose it to full sun and to eliminate competition. To avoid removing excessive foliage, reduction cuts may be needed to subordinate temporary branches to slow their growth rate.
- f) Potential scaffold branches should be:
  - a. Vertically spaced 18-24" apart. Scaffold branches to remain on mature tree should be spaced at 3 feet if growing above one another.

- b. Only one scaffold branch should remain per node (point of attachment).
- c. Scaffold branches should alternate around the trunk of the tree and not only be located directly above each other.
- d. Scaffold branches should be no more than ½ the diameter of the trunk immediately above the branch.
- e. Retain lateral branches along limbs, but each should be less than ½ the diameter of the limb at attachment. At least ½ of the foliage should be on branches (temporary and permanent) arising in the lower 2/3 of the tree. Similarly, branches should have like distribution of foliage along their length (lion's-tailing will not be permitted).
- g) Limb up temporary branches from the bottom 1/3 of the tree.
- h) Subordinate or remove branches that interfere with pedestrian or vehicular traffic. Only remove the part that interferes and be conservative.
- i) Remove and dead or broken branches from the upper canopy and water sprouts or suckers from the roots and trunk.
- j) Do not remove more than 1/4 of the leaf area of the tree or create a live crown ratio of less than 2/3 of the tree (Figure 1). If more pruning is necessary, contact the Director of Public Works or his designee prior to any additional work.
- k) If the above pruning will not be possible for a given tree contact the Director of Public Works or his designee

Figure 1. Acceptable and unacceptable live crown ratios for younger parkway trees (≤10" DBH) at the completion of structure pruning.

#### 8. Cleanup

All streets, driveways, and sidewalks shall be cleared. Care shall also be taken not to damage other trees, shrubs, or lawns during tree pruning operations.

Under no circumstances shall debris be left on the parkway or street over weekends or holidays. In addition, keeping debris off the street and parkway areas and out of the gutters prevents the debris from entering and plugging the sewer system. Environmentally accepted practices of debris disposal are also an important part of this work.

#### 10. Arborist Certification

There shall be at least one "Certified Arborist" or "Certified Tree Worker" as recognized by the International Society of Arboriculture on the job site **at all times**. If the project supervisor is not onsite at all times another staff member must be a "Certified Arborist" or "Certified Tree Worker". They must have the authority to direct the work onsite. They must be able to speak articulately to residents and Village staff about the work occurring onsite. This person cannot be functioning as

a supervisor and tree worker at the same time (per item 3 – Project Supervision above).

The Village requires that the bidder provide a proposed and actual work schedule for each week of the contract. These records must be turned into the Director of Public Works office, emailed, or faxed each Monday. The report will include the proposed work to be completed in the village for the week and an actual work completed report, including the specific days individual trees were pruned for the previous week.

The Director of Public Works or his designee will review the completed work and provide a punch list for trees and locations that have not met the specifications of the contract. The bidder will not be paid for an invoice including those locations until the associated punch list items have been addressed and confirmed complete.

All parkway areas are to be left flat and meet original grade and pitch from sidewalk to curb.

#### 5. Site Appearance and Disposal of Stump Grindings

After grinding (removal) of a tree stump and all associated roots, the Contractor shall remove all stump grindings and associated debris from the site with appropriate tools and equipment for the job. Stumps, grindings, and debris shall be placed away from the curb and gutter, street, sidewalk, and private property immediately to eliminate hazards to vehicular and pedestrian traffic, and to eliminate damage to private property. The contractor shall clean up the site and remove all grindings and debris within twenty-four (24) hours of grinding. All streets, driveways, and sidewalks shall be swept clean. Care shall also be taken not to damage other trees, shrubs, or lawns during tree stump removal

operations. The bidder shall leave a barricade or cone in every cleaned hole until the location is backfilled.

Grinding debris generated by the work described in this contract shall be the responsibility of the contractor. Payment for removal and disposal of debris is to be included in the unit price. Environmentally accepted practices of debris disposal are also an important part of this work.

#### 6. Backfilling

All areas where stumps have been removed and areas disturbed by the removal operation shall be backfilled and compacted to the level of the adjoining grade with pulverized black dirt (topsoil). This shall occur after the Director of Public Works or his designee confirms the stump grinding and cleaning has been done in a manner satisfactory to the contract. All holes must be backfilled within two business days of approval of Village staff. The Contractor shall supply his own topsoil. The topsoil shall be properly leveled and compacted so as to ensure a minimum of settlement of the backfill material. Grindings (chips) and debris must not be used as backfill material.

#### 7. Seeding

All adjacent disturbed areas and areas where backfill material was installed shall be seeded. Seed shall be a mixture composed of fifty (50%) percent Kentucky Bluegrass, thirty (30%) thirty percent Perennial Rye Grass, and twenty (20%) percent Creeping Red Fescue or other mix approved by the Director of Public Works or his designee

#### 8. Stumping Oversight by the Village

The Village will provide the contractor with lists of approximately 30 stumps for completion the next business week. All stump grinding and cleaning associated with the work list must be completed within the first two (2) business days of the week (weather dependent). Within one (1) business day of confirmation from the bidder that work has been completed, the Director of Public Works or his designee will inspect the locations and verify they meet the specifications of the contract. The bidder will be notified of locations that are found to be insufficiently ground, cleaned, or leveled. Sites must be corrected at no additional cost to the Village. Once the bidder receives confirmation of approved sites they will have 2 business days to backfill and seed the locations. Once the list has been completed and verified by Village staff a new list will be generated. This process will repeat until the planned stump removals for the period are complete.

#### Notification to the Resident

Upon backfilling and seeding a location the bidder shall leave a notice to the adjacent property owner regarding the completion of the work and the necessary watering. This notice will be provided by the Village and will be either a door hanger or a post-it note to attach to the front door or window.

#### 10. J.U.L.I.E.

The Contractor is responsible for any damage done to underground utilities while working in the parkway. The Contractor will submit the stump list to J.U.L.I.E. to be located prior to stump removal. The Contractor must submit the list to J.U.L.I.E. no more than three (3) working days after receipt from the Village. The Contractor must otherwise comply with all J.U.L.I.E. requirements.

#### 11. Sucker Growth

In the event that adventitious (sucker) growth should occur, the contractor shall be responsible for regrinding to eliminate sucker growth during a period of one year after initial grinding. Re-grinds must also be restored to grade and reseeded at no additional charge to the Village. Care shall also be taken not to damage other trees, shrubs, or lawns during stump removal and restoration operations.

#### 12. Method of Measuring

Stump removal shall be done on a flat rate, "per stump" basis.

#### 13. Reporting

The bidder is responsible for keeping the Village updated on its work. The Village requires that the bidder provide immediate notice upon completing grinding and cleaning for inspection. The bidder must also alert the Village to completion of a list for inspection and assignment of additional stumps.

### 14. Add On Parkway Restoration

The bidder shall provide pricing for parkway restoration work. In some instances, the parkway may be so disturbed or changed as a result of the parkway tree or the tree removal process that entire restoration with the installation of sod may be called for. These locations will be identified by the Village and the total square yardage of the proposed restoration will be determined. The bidder will be required to remove any additional material or bring in additional top soil to restore the original grade of the parkway between the sidewalk and the curb for the length determined by the Village. The bidder will then install sod at the location. Pricing will be based on a square yard price for sod installation. All additional work, not including the parkway tree stumping is incidental to the sod price. If stumping is required at one of these locations it will be paid at the regular contract rate in addition to the square yard sod installation price.

#### Detailed Specifications: Park District of Oak Park - Park Tree Pruning or Removal

#### Scope of Work

The Park District is seeking bid

s from qualified arboriculture contractors for the aerial pruning of park trees and the removal of selected trees within the Park District of Oak Park on an as needed basis. Current estimates for 2024 are removal of approximately 50-100 caliper inches and select pruning of all trees over 10"DBH in five (5) park sites.

#### Responsibility of Contractor

The selected contractor shall furnish all labor, supervision, tools, equipment, materials and supplies, and other means necessary for performing and completing the work, including debris hauling, and shall obtain and pay for any required permits.

#### **Detailed Specifications**

#### Removals

### 1. Location of Tree Removal Work

The location of the work will be the twenty-three (23) Park District sites within the Village of Oak Park, Illinois. All designated trees in the parks shall be removed and the stumps ground to a minimum four to eight inches (4-8") below grade. All tree removal work is to be done in accordance with the enclosed removal specifications.

It will be the bidder's responsibility to arrange all J.U.L.I.E. studies and to notify and make arrangements with the utility company for the removal of branches extending through power and/or telephone lines so removal operations will not be delayed.

The bidder shall protect sidewalks, curbs, streets, manhole covers and catch basins, housing property and automobiles from the impact of falling wood by the use of limb ground supports when needed.

#### 2. Method of Measuring

Trees to be removed shall be measured per inch of diameter. The diameter shall be measured at a point four feet (4') six inches (6") above the highest ground level at the tree and will be determined by dividing the measured circumference at that point by 3.1416.

#### Commencement of Work

The bidder shall remove all selected trees within time frame specified for those removals unless the Superintendent of Parks & Planning grants an extension.

Diameter inch total across all size classes for annual removals is estimated at a minimum 300 inches. Trees will be marked with a paint dot on the trunk.

#### 4. Cleanup

Immediately after removal of a tree has been completed, the area beneath the tree shall be raked and all debris shall be removed from the area. All streets, driveways, and sidewalks shall be swept clean. Care shall also be taken not to damage other trees, shrubs, or lawns during tree removal operations.

#### 5. Removal of Stumps and Debris

All stumps shall be ground to a depth of four (4) to eight (8) inches below grade. All grindings and all debris from tree removal operations shall be removed from the site and from the Village of Oak Park within twenty-four (24) hours after debris has been placed, unless authorized by Superintendent of Parks & Planning or his representative. No on site or Park District owned areas will be designated as log storage areas. Payment for removal and disposal of debris is to be included in the unit price. Additionally, no debris or logs shall be given to residents since they may harbor the Emerald Ash Borer. Under no circumstances shall debris be left on the parks over weekends or holidays. In addition, keeping debris off street and parkway areas and out of the gutters prevents the debris from entering and plugging the sewer system. Environmentally accepted practices of debris disposal are also an important part of this work.

#### **Pruning**

#### Location of Tree Pruning Work

1. The location of the work is known as: Park District of Oak Park, Illinois. Specific sites within the Park District are:

A) Barrie Park: 1000/1011 S. Lombard 47 TraceS
B) Carroll Park: 1125 S. Kenilworth 22 TraceS
C) Euclid Park: 705 W. Fillmore 30 TraceS
D) Maple Park: 1105 S. Maple 110 TraceS
E) Rehm Park: 515 Garfield 99 TraceS

Additional requests for pruning of specific tree(s) may be made (see non- emergency pricing)

All trees over 10 inches in diameter in the designated parks shall be pruned. All tree pruning work is to be done in accordance with the enclosed pruning specifications

It will be the bidder's responsibility to notify and make arrangements with the utility company for the removal of branches extending through power and/or telephone lines so removal operations will not be delayed.

The bidder shall protect sidewalks, curbs, streets, manhole covers and catch basins, housing property and automobiles from the impact of falling wood by the use of limb ground supports when needed.

- 2. All trees to be trimmed in accordance with the revised Pruning Standard for Shade Trees, latest edition, ANSI A300 (1995) pruning standards. Prune all trees so the natural form and shape of the tree is achieved so far as is possible. In the case of American Elms, prune trees so a "cathedral arch" effect is achieved. Crown reduction method preferred, particularly when pruning <u>Tilia</u> species and trees in the 8"-16" size class, with no more than one quarter of leaf surface to be removed. Balance tree evenly. Lower branches must be raised to a height of allowing 8 feet for pedestrian access.
- 3. For trees 8"-16" in diameter:
- Prune for central leader (if possible) by removing or subordinating co-dominant stems with drop-crotch cuts.
- Prune for scaffold limb selection. Thinning or subordinating cuts may need to be made to these branches to slow their growth rate.
- Potential scaffold branches should be vertically spaced 18" apart. Scaffold branches to remain on mature tree should be spaced at 3 feet if growing above one another.
- Scaffold branches should be no more than ½ the diameter of the trunk immediately above the branch
- Retain lateral branches along limbs, but each should be less than ½ the diameter of the limb at attachment.
- At least ½ of the foliage should be on branches (temporary and permanent) arising in the lower 2/3 of the tree. Similarly, branches should have like distribution of foliage along their length.
- 4. Raise all lower branches and hanging branches to a minimum height of 16 feet where practical on trees over 16" in diameter. Not more than one-fourth of foliage of mature trees to be removed.
- 5. Contractor responsible for re-prunes for a period of one year after completion of pruning section. Remove all sucker growth on the main trunk(s) to first main crotch. Remove all dead, dying, diseased, interfering, objectionable and weak branches and stubs greater than two inches in diameter from all trees.
- 6. Remove one of two or more crossed and/or rubbing branches greater than 2 inches in diameter from all trees where practical.
- 7. All cuts to be made sufficiently close to parent limb, without cutting into the branch collar or leaving a protruding stub, so that closure can readily start under normal conditions.
- 8. Rope down all branches where damage could be incurred by gouging of a sodded area and/or damage to public walks. Use caution where there is the possibility of damaging adjacent shrubs, trees, or flowers.

- 9. Pre-cut all limbs being removed whenever there is a possibility of stripping the bark.
- Report any structural weakness, decayed trunk or branches, split crotch or branches, or girdling roots within 24 hours of locating to the Grounds Maintenance Supervisor.
- 11. No person working in trees shall use shoes with spikes or any other footwear, which will, in the Park District's opinion, injure the trees while work is being performed. At no time shall any person working in trees for pruning purposes wear spurs or climbing irons.
- 12. Upon completion of pruning, there shall be a minimum of 10 feet clearance from play equipment and buildings (including roofs).

To avoid misunderstanding, the terms in part 5 above will be used as defined below:

- A. "Sucker Growth" The bushy and undesirable growth of small shoots on the trunk of a tree or in close proximity to the trunk.
- B. "Interfering Branches" Branches which are growing in contact with or within (15) feet of signage, manmade structures or overhanging a structure.
- C. "Objectionable Branches" Branches, which are growing in such a manner that, they cause unnecessary crowding, or are undesirable if the natural form and shape of the tree is to be achieved, or are growing in a direction heading into the crown of the tree.

It will be the Contractor's responsibility to notify and make arrangements with the utility company for the removal of branches extending through power and/or telephone lines, so the pruning operations will not be delayed.

The Contractor shall protect sidewalks, curbs, streets, manhole covers and catch basin, housing property and automobiles from the impact of falling wood by the use of limb ground supports when needed.
