1. DESCRIPTION OF SUPPLIES AND SERVICES

- 1.1. GOAL:** It is the intent of the State of Illinois to establish a Joint Purchase Master Contract for bulk rock salt to be purchased on an as-needed basis during the contract period in the identified districts.

This Joint Purchase Master Contract (JPMC) may be utilized by all Governmental Units as defined in Section 5 of this Contract.

Note: Participation in this contract is based upon an annual survey that defines the BidBuy line items and additional participation in the resultant contract is not allowed.

1.2. SUPPLIES AND/OR SERVICES REQUIRED:

- 1.2.1. The Vendor will provide rock salt based on quantity ordered and within the timeframe listed herein.

1.2.2. Rock Salt Specification Requirements:

1.2.2.1. Rock Salt shall comply with the requirements of The American Association of State Highway and Transportation Officials (AASHTO) SPECIFICATION M143, SODIUM CHLORIDE TYPE 1, GRADE 1.

1.2.2.2 Rock Salt shall be free flowing fresh stock, reclaimed or re-crushed rock salt will not be accepted and shall be rejected by delivery site.

- 1.2.3. Quantity Commitments: All participants who complete the annual survey will have the option to choose between a minimum of 80% or 100% purchase commitment and will be allowed a maximum of 120% purchase commitment as defined below. All minimum purchase commitments will be defined in the line item description within BidBuy.

1.2.3.1 Minimum 80% Commitment: Some participants identified from the annual survey have chosen a minimum purchase commitment of 80%. That means that if the participant estimates a quantity of 100 ton, the participant is only obligated to order 80 ton. That is 80% of the estimated quantity. The participant shall have no further liability to the Vendor for further remaining quantities.

1.2.3.2 Minimum 100% Commitment: Some participants identified from the annual survey have chosen a minimum purchase commitment of 100%. That means that if the participant estimates a quantity of 100 ton, the participant is obligated to order 100 ton. That is 100% of the estimated quantity.

- 1.2.2.3 Maximum 120% Commitment: The Vendor shall agree to provide up to 120% of the bid quantity estimated tonnage at the same contract price. That means that all participants who estimate a quantity of 100 ton can order up to 120 ton at the same contract price.
- 1.2.2.4 Quantities Exceeding 120% Maximum: In some instances, a participant may require quantities that would exceed the maximum commitment of the Vendor; in such instances, any delivery shall be made upon the mutual agreement of all parties.
- 1.2.2.5 Purchase Percentages for IDOT: The Illinois Department of Transportation (IDOT) has provided estimated quantities for individual locations. Quantities purchased from each Vendor shall be computed on a District by District basis (not by location). For example, if a Vendor has 2 locations in a District with estimated quantities of 100 and 200 tons with a minimum 80% commitment. Then the 80% commitment will be met once the $300(0.8) = 240$ tons has been purchased between the two locations. This may include all 240 tons purchased from one location.

1.2.4. Weights and Measures Requirements and Adjustments:

- 1.2.4.1 Weights and Measures: All measurements for weight shall be from scales meeting the requirements of The Weights and Measures Act of the State of Illinois (225 ILCS 470). The Vendor shall provide accurate weights of materials delivered to governmental units. These weights shall be documented on delivery tickets which shall identify the source of the material, type of material, the date and time the material was loaded, the release number, the net weight, the tare weight, and the identification of the transporting vehicle.

The State reserves the right to conduct random, independent vehicle weight checks for salt deliveries. This will require that trucks occasionally be directed to a scale near the delivery point.

Should the vehicle weight check result in the net weight of material on the vehicle to exceed the net weight of material shown on the delivery ticket by 600 pounds or more, the State will document the independent vehicle weight check and immediately furnish a copy of the results to the Vendor. No adjustment in pay quantity will be made.

Should the vehicle weight check result in the net weight of material shown on the delivery ticket to exceed the net weight of material on

the vehicle by the tolerance of 600 pounds or more, the State will document the independent vehicle weight check (IWC1), immediately furnish a copy of the results to the Vendor, and immediately perform a second independent weight check (IWC2). If the second independent weight check is within the 600-pound tolerance, then a third independent weight check (IWC3) will be performed. If the third independent weight check is within tolerance, no pay adjustments will be made, and random independent weight checks will resume. If the second or third independent weight check confirms the net weight of the material shown on the delivery ticket exceeds the net weight of material on the vehicle by 600 pounds or more, the State will adjust the net weight shown on the delivery ticket for IWC1 to the checked delivered net weight as determined by the independent vehicle weight checks.

1.2.4.2 Method of Measurement: The State will also adjust the method of measurement for IWC2, IWC3 (when applicable) and subsequent truck loads using the same scale based on the out-of-tolerance independent weight checks. The net weight of rock salt delivered to the State from this source, will be adjusted by applying a correction factor “A” as determined by the following formula:

$$A = 1.0 - (B - C) / B; \text{ Where } A < 1.0 \text{ and } B - C > 600$$

Where: A = Adjustment factor
 B = Net weight shown on the delivery ticket from IWC1
 C = Net weight on the vehicle determined from independent weight check from IWC1

The adjustment factor will be applied as follows:

Adjusted Net Weight = A x Delivery Ticket Net Weight

The adjustment factor will be imposed until the cause of the deficient weight is identified and corrected by the Vendor to the satisfaction of the State. If the cause of the deficient weight is not identified and corrected within seven calendar days, the State reserves the right to immediately, and without notice to Vendor, take action to remedy Vendor failure. This action may include the termination of the order and purchase of salt from other sources, or other action to ensure ice control availability for public safety purposes. Note that any or all additional costs may be collected from the original Vendor, in addition to the applied weight adjustments.

At the Vendor's option, the vehicle may be weighed on a second independent Department of Agriculture certified scale to verify accuracy of the scale used for the independent weight check. The freight for this additional weigh will be charged to the party that is proven to be negligent.

1.2.4.3 Deductions: The State reserves the right to assess, and apply if applicable, invoice deductions for the following:

Moisture Content: Deductions by percentage for moisture content based on total weight shall be determined by the following ranges:

| Moisture Content (%) | Deduction in Price (Per Truckload) |
|----------------------|------------------------------------|
| 0.00 TO 2.00 | NO DEDUCTION |
| 2.01 TO 2.50 | 10% DEDUCTION |
| 2.51 TO 3.00 | 15% DEDUCTION |
| 3.01 TO 3.50 | 20% DEDUCTION |
| 3.51 TO 4.00 | 25% DEDUCTION |
| GREATER THAN 4.01 | REJECTION OF LOAD |

Sodium Chloride (NACL) Content: The State reserves the right to accept delivery of rock salt which, according to the analysis by The Illinois Department of Transportation, has a Sodium Chloride (NACL) content of less than 95.0 percent, but not less than 90.0 percent. When such reservation is applied, final payment will be made on the following basis:

- 1) When NACL content is between 94.0 and 94.9 percent, the price to be paid shall be the contract price less \$5.00 per ton.
- 2) When NACL content is between 90.0 and 93.9 percent, the price paid shall be contract price less \$10.00 per ton.
- 3) When the NACL content is less than 90.0 percent, the load will be rejected.

1.2.5. Ordering

1.2.5.1 Order Placement: Orders may be placed with the Vendor (Monday-Friday) via telephone, with a written electronic communication (e-mail) or fax confirmation to follow. All State agency orders will contain a purchase order generated from BidBuy in addition to an electronic communication (e-mail). Vendors shall arrange for immediate

shipment upon receipt of order from an authorized participating agency representative.

All other governmental units will use their own purchase order system.

- 1.2.5.2 Order Quantities: Orders shall be scheduled in amounts that make up full (22-25 ton) truckloads, orders for less than truckload will not be accepted.
- 1.2.5.3 Initial Orders: The Illinois Department of Transportation requires Vendors to ship initial fill-up orders prior to October 31st of the current year. If this date has passed prior to execution, we ask that the Vendor(s) start shipping as soon as contract has been executed. Please see the attached file within BidBuy titled "Initial Orders". Vendor(s) shall notify each destination entity when initial shipments are to begin.
- 1.2.5.4 Seasonal Orders: Non-State agencies reserve the right to purchase up to 50% of the estimated order requirements prior to November 30th of the current year. Vendor shall notify each delivery point of when shipment is to begin.
- 1.2.5.5 Order Timeline: For an order placed prior to 9:00 a.m. on a given day, that day would be considered as the first calendar day of the seven (7) day delivery period. For an order placed after 9:00 a.m. on a given day, the day following would be considered as the first calendar day of the seven (7) day delivery period, or as amended by order guidelines in Section 1.2.5.6.
- 1.2.5.6 Order Guidelines: An agency may order up to 20% of their 100% contracted tonnage in any given week and Vendor shall deliver within 7 working days after receipt of order. Quantities ordered above the 20 percent threshold shall have an extended delivery time of one-working-day for each one percentage-point above the 20% guideline. For example, if an agency orders 25% of their awarded total 100 tons, delivery of the first 20 tons (20%) shall be within 7 working days after receipt of order and the remaining 5 tons shall be delivered within 12 working days after receipt of the order.
- 1.2.5.7 Peak Season Orders: After hours and weekend delivery arrangements are encouraged during severe seasonal weather events to provide Vendor additional ability to maintain a prompt order delivery schedule. Orders placed during peak season should be in accordance with projected requirements and not in excess of the order guidelines,

thereby hindering a Vendor's ability to maintain a prompt order delivery schedule.

1.2.5.8 Post Season Orders: All orders for Rock Salt shall be placed by the end of July for the previous season's estimated usage. If the location does not have adequate capacity to hold the rock salt, the Vendor may elect to add a storage charge per ton/day.
