Detailed Specifications: Business District Maintenance

The Village maintains the streetscape in multiple business districts across the Village. The Village staff, business owners, and residents place high importance on the quality and cleanliness of their business districts. Business districts limits will be outlined below but may include directly adjacent streets and parking lots in addition to the primary streetscape. Maintenance payments will be made on a monthly lump sum price per business district. There will be an additional Spring Clean-up and Fall-Clean up price for each as well. All other work will be considered incidental to the monthly maintenance cost.

1. Planter Bed Maintenance

These areas contain no turf, but require weekly maintenance. Maintenance of these areas will be comprised of the following procedures:

a. Spring Clean Up

Remove all accumulated litter, winter debris, and leaves from planter beds, sidewalks, curb, and parking lot areas. Cut are herbaceous decorative grasses to approximately 2" above grade. Mulch all planting beds. New mulch areas must be four inches (4") deep, existing mulch areas must be refreshed with two inches (2"). Mulch must be premium double processed hardwood bark mulch natural in color. Hardwood bark mulch shall be clean, finely shredded mixed-hardwood bark, not to exceed two (2) inches in its largest dimension and free of foreign matter, sticks, stones and clods. All hardwood bark mulch shall be processed through a hammermill. Tree pits without tree grates should be mulched to grade. Inventory all damaged, diseased, or dead plants and submit list to the Forestry Superintendent.

b. Weed and Litter Control

Areas to be de-littered, weeded, and inspected weekly. All shrub and planting beds, flowerbeds, groundcover areas, tree rings, mulched and/or stone areas, planters and brick paver areas shall be kept weed free. All weed control treatment applications must be in conformance with the Village's Integrated Pest Management Plan. Apply non-selective weed control in parking / paved and paver areas as needed to keep these areas

weed free with Round Up or approved equivalent. Forestry Superintendent shall be notified prior to application of any control measures for material approval and scheduling. All applications to be made by licensed personnel. Applications may be restricted to weekend or off-time hours. Cultivate planting beds as required to control weeds and define edges. Inspect plants for damage and correct as necessary.

c. Fertilization

Fertilize shrubs three (3) times per year at appropriate intervals with approved, balanced, complete analysis slow release fertilizer including micronutrients.

d. Shrub Pruning

Prune or shear all deciduous shrubs three times per year during the growing season, evergreen shrubs twice per year, cutting current year's growth unless otherwise directed. Prune and maintain ornamental ivy and/or groundcover as needed.

e. Fall Clean-up

Remove all leaves and fall debris from bed, parking areas and borders. Removed all spent material on herbaceous perennials to approximately 2" above grade except for decorative grasses.

f. Insect and Disease Monitoring

Accurately monitor and identify plant disease and insect pests. Notify the Forestry Superintendent of problems discovered and suggest treatment strategies. All applications for insect pest and disease control must have prior approval of Forestry Superintendent concerning timing, material used, and application method.

2. Tree Pit Weeding

The Village has trees located in pits with and without cast iron grates throughout its business districts. Pits are typically 5'x5' with double ground wood chips or gravel mulch. During the growing season, tree pit weeding is required to maintain a clean look within the business district. Weeding would involve the manual removal of all herbaceous material in the tree pit along with as much of its associated root system as possible. Chemical weed control may be used as necessary. All weed control treatment applications must be in conformance with the Village's Integrated Pest Management Plan. Forestry Superintendent shall be notified prior to application of any control measures for material approval and scheduling. All applications to be made by licensed personnel. Applications may be restricted to weekend or off-time hours.

3. Sidewalk and Curb Weeding

Sidewalk and curb areas to be inspected and weeded weekly. All sidewalk, stone, and paver areas shall be kept weed free. All weed control treatment applications must be in conformance with the Village's Integrated Pest Management Plan. Apply non-selective weed control in parking / paved and paver areas as needed to keep these areas weed free with Round Up or approved equivalent. Forestry Superintendent shall be notified prior to application of any control measures for material approval and scheduling. All applications to be made by licensed personnel. Applications may be restricted to weekend or off-time hours. Cultivate planting beds as required to control weeds and define edges. Inspect plants for damage and correct as necessary.

4. Litter Control

All sidewalk, street, and curb areas to be inspected and de-littered weekly. All litter must be collected and disposed of by the Bidder offsite.

5. Locations and Quantities of Work

The quantities indicated on the table below are estimated quantities. The Village of Oak Park reserves the right to vary from estimated quantities based on possible inclusion of areas not listed or exclusion listed areas.

Detailed Specifications: Container Seasonal Display and Maintenance

The Village has collaborated to install unified streetscape improvement on various business districts throughout the Village. That project was designed to include unified landscaping, including planters. This Bidder is responsible for the installation and maintenance of plant material in approximately 475 above ground planters. The design for each of the two installations will be provided for the Bidder after assignment. Bidding shall be based on plant sizes and quantities. Pricing for future designs will be based on plant size pricing proved for 2017.

All planters in business areas and other locations shall be planted with summer and fall plant rotations in season. Type-Species, size, and quantity of plant material shall be approved by the Village prior to installation. Plant schedules for quantities, species and sizes will be provided at the time the award is made to the successful contractor. Replacement of missing grasses, transplanting, replanting, and division and replanting of grasses/perennials shall be at the direction of the Forestry Superintendent as an approved extra, not as part of base bid.

A Landscape Architect/Client Representative will supervise all work by the contractor for the entire duration of each rotation installation in addition to the transplanting, division, and replacement of existing plant material as noted on the drawings.

Commencement of any work shall not be approved until the contractor supplies the soil mix sample, a list of procured plant material, and has obtained approval of the Landscape Architect and the Village.

1. Summer Rotation Installation:

The summer rotation shall be planted no later than May 10, 2017, (unless weather conditions warrant a later date and then only with the approval of the Forestry Superintendent) and be maintained through September 29, 2017, unless otherwise directed by the Urban Forestry Superintendent or his/her designee.

It is the responsibility of the successful bidder to locate, deliver to the site, and keep in good health all plant material specified for each seasonal rotation. All flowering plants should be budding/newly flowering at time of planting. All work shall be completed as specified in a timely manner as dated on the landscape plans. Clean up of spent plant material and cutting back of ornamental grasses shall be performed by contractor before the summer rotation installed and shall be incidental to the contract.

Fill all planters with approved planting medium as required to a finished grade within one inch (1") of top of planter. Type, size, and quantity of plant material shall be approved by the Village prior to installation. See plant schedules for exact quantities, species and sizes.

Payment for installation and maintenance of both the Summer and Fall landscape rotations shall be made separately. The Downtown Oak Park (DTOP) commercial district shall have its own pay items for this work. All other commercial districts and municipally-owned properties included in this contract have been grouped together and will be paid for under similar but separate pay items as Village of Oak Park (VOP) areas.

2. Fall Rotation Installation:

The Fall rotation shall be planted no later than September 22, 2017, and maintained through December 15, 2017, at which time all seasonal plantings will be removed unless otherwise directed by the Urban Forestry Superintendent or his/her designee.

It is the responsibility of the successful bidder to locate, deliver to the site, and keep in good health all plant material specified for each seasonal rotation. All flowering plants should be budding/newly flowering at time of planting. All work shall be completed as specified in a timely manner as dated on the landscape plans.

Fill all planters with approved planting medium as required to a finished grade within one inch (1") of top of planter. Type, size, and quantity of plant material shall be approved by the Village prior to installation. See plant schedules for exact quantities, species and sizes.

Payment for installation and maintenance of both the Summer and Fall landscape rotations shall be made separately. The Downtown Oak Park (DTOP) commercial district shall have its own pay items for this work. All other commercial districts and municipally-owned properties included in this contract have been grouped together and will be paid for under similar but separate pay items as Village of Oak Park (VOP) areas.

3. Replacement Material:

Replacement of missing grasses, transplanting, replanting, and division and replanting of grasses and perennials shall be at the direction of the Forestry Superintendent as an approved extra, not as part of base bid. See attached drawings, schedules and planter quantities and locations. Please note: materials lost due to poor maintenance will be replaced at the cost of the Bidder.

4. Maintenance:

All planters shall be weeded weekly and fertilized as needed to keep plantings vigorous and attractive. Particular emphasis will be placed on high standards of quality and professionalism, including weed control and litter control in areas immediately surrounding planters. The bidder is responsible for maintaining a two foot (2') band around the base of the planter in a weed free condition. The successful bidder will have on staff a State of Illinois licensed Pesticide Applicator and licensed Pesticide Operators as needed. Incidental to the planter program, the contractor shall fertilize planters as recommended by the fertilizer manufacturer to assist plants with vigorous and healthy growth throughout the growing season.

Maintenance work shall be paid for separately per month, and shall include final plant removal at the end of the rotation season as directed by Village staff, his designee, or Landscape Architect.

5. Soil:

The Bidder shall supply the Forestry Superintendent with one pound (1 lb.) sample of proposed planting medium with breakdown of components for approval prior to the installation of the summer rotation.

The planting medium mix shall be:

Two (2) parts pulverized topsoil, one (1) part torpedo sand, one (1) part leaf compost, one (1) part pine bark fines. For each cubic yard of the mix, add six to seven pounds (6-7 lb.) controlled release fertilizer (lasting 3-4 months), one pound (1 lb.) minor elements, and one pound (1 lb.) iron sulfate. The planting medium mix shall be supplied by or approved equal:

RR Mulch & Soil Products, LLC
Chicago, Illinois
(773) 544-4655

6. Watering:

The contractor shall water all planters as needed at the unit prices submitted to maintain plant health and attractive appearance throughout the year. Additional watering may be required by the Village during drought or exceptionally hot weather. Water shall be provided by the Village at no cost for this contract, but all water must be metered.

The contractor shall obtain water by filling their truck or trailer-mounted tank at the Public Works Facility filling station located outside the Public Works Facility, 201 South Boulevard, where a permanently installed 2-inch water meter and backflow prevention device is located. Filling of water tanks at other locations in town shall not be permitted.

Watering trucks or trailers shall be equipped with functional hazard warning lights and a triangular red and orange slow-moving vehicle emblem meeting Illinois DOT specifications. All employees shall wear IDOT approved high-visibility safety vests or T-shirts.

Payment for watering shall be made at the hourly rate for watering from a water truck. Unit prices for watering shall be for one employee and all ancillary equipment or items needed to complete the task. Plants that fail because of a lack of water will be required to be replaced at the Bidders expense.

shall be processed through a hammermill. Replace/refresh mulch as requested throughout the year at unit price indicated on the bid sheet. Bidder must provide a sample of the proposed mulch before approved

5. Watering

During especially hot weather, the Village may requests that certain locations receive supplemental watering. This may include turf, landscape bed areas, and tree locations. Watering will require the use of a tank truck with multiple locations to visit. The contractor shall obtain water by filling their truck or trailer-mounted tank at the Public Works Facility filling station located outside the Public Works Facility, 201 South Boulevard, where a permanently installed 2-inch water meter and backflow prevention device is located. Filling of water tanks at other locations in town shall not be permitted.

6. Parkway Restoration

- i. Preparation - Square all areas to be restored with a spade or other edging tool to make a clean edge with existing parkway. Remove dead or damaged turf where required. Clean fill from the site may be used as backfill.
- ii. Backfill - Backfill and compact with a sufficient amount of clean fill to allow for settling and match grade at all edges.
- iii. Seed and Top-dress - Seed with all-purpose sun-shade fescue/ryegrass/bluegrass mix, and top-dress with Penn Mulch (or approved equal) and starter fertilizer.
- iv. Excess Material Removal - Restoration areas will typically be left by the utility crew anywhere from zero (0") to six (6") below finished grade. Any mounded dirt, stone, or debris higher than proposed finished grade shall be removed and disposed of by the contractor. Payment for Excess Material Removal shall be made by the cubic yard.
- v. Additional Fill - Restoration areas will typically be left by the utility crew anywhere from zero (0") to six (6") below finished grade. The contractor shall place and compact additional fill as necessary to bring the restoration area up to an elevation six (6") below finished grade. Additional fill shall consist of reasonably clean dirt, and may be sourced from other restoration areas within the Village but shall not include excessive amounts of construction debris or organic material. Payment for Additional Fill shall be made by the cubic yard, complete and in place.

7. Sod Installation

This work shall consist of preparing the ground surface and furnishing, transporting and placing sod and other materials required in the sodding operations. All sod shall be top quality, nursery grown, dense, well rooted, and free from weeds and unsuitable grasses.

- i. Sod Type and Care - The sod shall be weed-free nursery grown Kentucky Blue Grass. Care shall be taken to retain the native soil on the roots during the process of stripping, transporting and placing. Sod shall be subject to inspection and approval at place of growth and/or upon delivery for conformity to specification requirements. Approval at place of growth shall not impair the right of inspection and rejection upon delivery at the site or during the process of the work.

- ii. Preparation - Prior to placing sod, the existing soil shall be scarified to a depth of three inches (3"). The existing soil shall be free of rocks, sticks, and debris. If required, topsoil meeting the requirements for top soil mix shall be added to bring the area to grade. Topsoil will not be paid for separately but shall be considered incidental to Sod Installation. Prepared soil surfaces that became crusted shall be reworked to an acceptable condition for sodding. All soil surfaces shall be moist when the sod is placed. When directed, the Contractor shall be required to apply water to dry soil surfaces at a minimum rate of one (1) Gallon/feet immediately prior to placing the sod. Reworking and moistening the soil surface shall not be measured for payment but considered incidental to Sod Installation.
8. **Split Rail Fence Post and Rail Replacement**
Village owned wood split rail fences are damaged throughout the year. Remove damaged fence materials and purchase and install fence posts or split rails at unit prices indicated on bid sheet when requested.
9. **Tree Pit Weeding**
The Village has trees located in pits with and without cast iron grates throughout its business districts. Pits are typically 5'x5' with double ground wood chips or gravel mulch. During the growing season, tree pit weeding may be required to maintain a clean look within the business district. This work is typically done at the request of the business district. Weeding would involve the manual removal of all herbaceous material in the tree pit along with as much of its associated root system as possible when requested.

Licenses and Permits

The Contractor shall be responsible for becoming a licensed Contractor with the Village. The Village will issue any necessary permits for this work at no fee.

Alterations, Omissions and Extra Work

The Village of Oak Park reserves the right to increase or decrease the quantity of any item or portion of the work, or to omit portions of the work as may be deemed necessary.

Method of Payment

The Village of Oak Park will pay monthly, all undisputed of invoices within 30 days of approval as provided in the Local Government Prompt Payment Act, 50 ILCS505/4. The maximum interest rate for any payment not made within 30 days of approval is 1%.

Change Orders

Change Orders: Changes in the Work may be agreed to after execution of the Agreement, and without invalidating the Agreement, if the Change Order is in writing and signed. Any changes to the scope of work which result in an increase in the agreement price will be subject to an agreement addendum which must be signed by both parties. Any such Change Order will be prepared by the Village. The Contractor may only proceed with the Change upon receipt of the written Change Order signed by the Village.

Emergency Changes: Contractor may perform work not included in the Scope of Work if necessary to remedy a condition that poses an immediate threat to persons or property. Work of this nature shall be carried out only to the extent of bringing the condition under control. The Village shall be notified immediately. A Change Order will then be negotiated and executed for the work performed, and for work remaining, if any.

Minor Changes (Field Orders): The Village may verbally authorize minor changes in the Scope of Work in order to prevent a delay in the progression of the Work. These field orders may not involve a change in the agreement price or be inconsistent with the Scope of Work.

Changes Due to Unknown Conditions: The Contractor is not responsible for Changes in the Work that are due to conditions that were not reasonably observable or conditions that have changed. In such cases, the Contractor shall notify the Village and a Change Order will be negotiated.

Any Change which results in a total agreement price in excess of \$10,000 must be approved by the Village of Oak Park Board of Trustees.

Correction of Work Prior To Final Payment

The Village has the right to stop work if the Contractor fails to carry out the work in a manner acceptable to the Village. If the Village deems the Contractor's work unacceptable, at the Village's election, the Contractor shall do one of the following:

1. Promptly repair or replace the defective work, without expense to the Village, including costs associated with repairing any damage to property caused by the replacement work; or;
2. If the Village deems it unacceptable to have the Contractor correct work which has been incorrectly done, a deduction from the agreement price shall be made based on the costs to the Village to have the work repaired. Such a deduction from the agreement price shall in no way affect the Village's other remedies or relieve the Contractor from responsibility for defects and related damage occurring as a result of defective or unacceptable work.

Bidder's Representative

The bidder shall have at all times a competent foreman or superintendent on the job that shall have full authority to act for the bidder, and to receive and execute orders from the Director of Public Works or appointed representative.
