NJPA Contact Information

Petersen Industries, Inc., choice manufacturer of knuckle boom loaders since the 1950's, offers a wide variety of equipment capable of meeting public works and bulky waste collection needs. Over 900 municipalities, major waste companies, agricultural, arboricultural and aggregate markets add value to their organizations by utilizing Petersen's Lightning Loader grapple trucks for a multitude of applications.

Manufacturing all major components, Petersen controls every aspect of schedule and quality assurance while serving as the single point of responsibility to customers. Petersen's continued commitment to customers, array of versatile designs, and nationwide dealer network contributes to us remaining the grapple truck industry leader.
