1. Location of Tree Pruning Work

The location of the work is known as: PUBLIC RIGHT-OF-WAY within the Village of Oak Park, Illinois, on right-of-way or on property furnished by the owner. All trees over 6 inches in diameter on inventory sheets supplied to the Contractor in the general area designated on the proposal sheet shall be pruned. All tree pruning work is to be done in accordance with the enclosed pruning specifications.

It will be the bidder's responsibility to notify and make arrangements with the utility company for the removal of branches extending through power and/or telephone lines so removal operations will not be delayed.

2. Extent of Services

The bidder shall prune all trees designated on pruning sheets and commence work no later than January 2nd, 2018 (weather dependent). Contractor must be on site each week and prune a minimum of **300 trees each week for the length of the contract**. All work shall be completed by April 13th, 2018, unless the Village Forestry Superintendent grants an extension. Diameter inch estimates per size class are provided on the bid sheet.

3. Project Supervision

The bidder shall designate a project supervisor who will be the primary contact for the contract. This person must be onsite daily to meet with Village representatives and oversee the operations of the crew. If not in town at all times they must be available by phone and in close proximity to deal with any potential issues in an immediate manner. This person cannot be a tree worker and must be an International Society of Arboriculture Certified Arborist.

4. Inspection and Project Meetings

The bidder's project supervisor shall notify the office of the Forestry Superintendent at the beginning and end of any workday where crews are in Oak Park giving the location of that day's work. The Forestry Superintendent must also be notified on any work day that crews will not be in Oak Park prior to completion of the project.

The Forestry Superintendent or his representative will daily inspect the work and will always be available should any problems arise. The project supervisor should expect to meet daily with the Forestry Superintendent or his representative to discuss the past work completed and upcoming issues.

5. Resident Vehicle Parking Issues

It shall be the bidder's responsibility to ensure the proposed work area each day is clear of vehicles. The Village will provide a limited number of "No Parking" signs for the contract, but it will be the responsibility of the bidder to move the signs each day for the next day's work. The bidder will not be permitted to post more blocks than can be accomplished in any one day. Special attention should be paid to areas around schools and multi-unit dwellings to minimize impact to the residents. While the Village has an overnight parking ban, that cannot be relied on to provide clear streets. The Village will not assist the bidder with contacting residents or vehicle relocation if they have not properly posted parking restrictions.

6. Method of Measuring

Trees to be pruned shall be measured per inch of diameter. The diameter shall be measured at a point four feet (4') six inches (6") above the highest ground level at the tree and will be determined by dividing the measured circumference at that point by 3.1416.

7. Pruning Specifications

a. All Trees

- i. Trees to be trimmed in accordance with the revised Pruning Standard for Shade Trees, latest edition, ANSI A300 pruning standards.
- ii. Prune all trees so the natural form and shape of the tree is achieved so far as is possible. Crown reduction method preferred where parkway width is sufficient to gain specified clearances, particularly when pruning Tilia species and trees in the 6"-16" size class.
- iii. Balance tree evenly.
- iv. Lower branches must be raised to a height of allowing a minimum of 8 feet of pedestrian access on the sidewalk at the end of a four-year period and must not protrude over the curb for the same period when possible.
- v. Raise all lower branches and hanging branches to a minimum height of 16 feet where practical and if possible on trees over 16" in diameter. No more than approximately one-fourth of foliage of **mature** trees to be removed.
- vi. Upon completion of pruning, there shall be a minimum of 16 feet clearance from house and buildings (including roofs). Situations where this minimum cannot be met without undue harm to the tree need to be approved by the Forestry Superintendent or his designee.

- vii. Remove all dead, dying, diseased, interfering, objectionable and weak branches and stubs greater than one inch in diameter from all trees. Remove all sucker growth on the main trunk(s) to first main crotch.
- viii. To avoid misunderstanding, the terms in parts "vii" above will be used as defined below:
 - a. "Sucker Growth" - The bushy and undesirable growth of small shoots on the trunk of a tree or in close proximity to the trunk.
 - b. "Interfering Branches" - Branches which are growing in contact with or within (15) feet of signage, manmade structures or overhanging a structure.
 - c. "Objectionable Branches" - Branches, which are growing in such a manner that, they cause unnecessary crowding, or are undesirable if the natural form and shape of the tree is to be achieved, or are growing in a direction heading into the crown of the tree.
- ix. Remove one of two or more crossed and/or rubbing branches greater than 2 inches in diameter from all trees where practical.
- x. All cuts to be made sufficiently close to parent limb, without cutting into the branch collar or leaving a protruding stub, so that closure can readily start under normal conditions.
- xi. Rope down all branches where damage could be incurred by gouging of a sodded area and/or damage to public walks. Use caution where there is the possibility of damaging adjacent privately owned shrubs, trees, or flowers.
- xii. Pre-cut all limbs being removed whenever there is a possibility of stripping the bark.
- xiii. Report any structural weakness, decayed trunk or branches, split crotch or branches, or girdling roots within 24 hours of locating to the Forestry Supervisor.
- xiv. No person working in trees shall use shoes with spikes or any other footwear, which will, in the Village's opinion, injure the trees while work is being performed. At no time shall any person working in trees for pruning purposes wear spurs or climbing irons.
- xv. Clear all streetlight and traffic control devices including non-illuminated signage to allow adequate lighting and sign visibility for the length of the prune cycle. Clear small parkway trees to allow natural growth habit without severely altering the form of the larger tree.
- xvi. It will be the Contractor's responsibility to notify and make arrangements with the utility company for the removal of branches extending through power and/or telephone lines, so the pruning operations will not be delayed.

b. For trees 6"-16" in diameter:

Trees within this size class must be pruned in a top down method. **Achieving a strong central leader along with a strong scaffold structure is of primary importance.**

- i. Prune for central leader by removing or subordinating co-dominant stems with reduction cuts.
- ii. Prune for scaffold limb selection. Thinning or subordinating cuts may need to be made to these branches to slow their growth rate.
- iii. Potential scaffold branches should be vertically spaced 18" apart. Scaffold branches to remain on mature tree should be spaced at 3 feet if growing above one another.
- iv. Scaffold branches should be no more than ½ the diameter of the trunk immediately above the branch
- v. Retain lateral branches along limbs, but each should be less than ½ the diameter of the limb at attachment.
- vi. At least ½ of the foliage should be on branches (temporary and permanent) arising in the lower 2/3 of the tree. Similarly, branches should have like distribution of foliage along their length.

8. Cleanup

Immediately after pruning of a tree has been completed, the area beneath the tree shall be raked and all debris shall be removed from the area. All streets, driveways, and sidewalks shall be swept clean. Care shall also be taken not to damage other trees, shrubs, or lawns during tree removal operations.

9. Removal of Debris

All debris from tree pruning operations shall be removed from the site and from the Village of Oak Park the same business day debris has been placed, unless authorized by Forestry Superintendent or his representative. No on site or Village owned areas will be designated as debris storage areas. Payment for removal and disposal of debris is to be included in the unit price.

Under no circumstances shall debris be left on the parkway or street over weekends or holidays. In addition, keeping debris off the street and parkway areas and out of the gutters prevents the debris from entering and plugging the sewer system. Environmentally accepted practices of debris disposal are also an important part of this work.

10. Method of Measuring

Trees to be pruned shall be measured per inch of diameter. The diameter shall be measured at a point four feet (4') six inches (6") above the highest ground level at the tree and will be determined by dividing the measured circumference at that point by 3.1416.

11. Arborist Certification

There shall be at least one "Certified Arborist" or "Certified Tree Worker" as recognized by the International Society of Arboriculture on the job site at all

times. If the project supervisor is not onsite at all times another staff member must be a "Certified Arborist" or "Certified Tree Worker". They must have the authority to direct the work onsite. They must be able to speak articulacy to residents and Village staff about the work occurring onsite.

12. Reporting and Punch Lists

The bidder is responsible for keeping the Village updated on its work on a weekly basis. The Village requires that the bidder provide a proposed and actual work schedule for each week of the contract. These records must be turned into the Forestry Superintendent's office, emailed, or faxed each Monday. The report will include the proposed work to be completed in the village for the week and an actual work completed report, including the specific days individual trees were pruned for the previous week.

The Forestry Superintendent or his designate will review the completed work and provide a punch list for trees and locations that have not met the specifications of the contract. The bidder will not be paid for an invoice including those locations until the associated punch list items have been addressed and confirmed complete.

13. "On Call" Emergency Work

The bidder is required to provide On Call Emergency work and equipment as necessary. Failure to respond or provide the requested equipment and services may be considered a breach of contract.

All stumps designated as “Fall Period Stumps” shall be removed within the time frame specified for those removals – September 1 through November 15. Total number of stump removals is estimated at 300 stumps for this period.

4. **Stump Removal**

In an effort to facilitate future planting in the parkway, the contractor shall remove all tree stumps and buttress roots designated by the Forestry Superintendent or representative completely or to a depth of twenty-four inches (24”) below the adjacent ground level. Additionally, the contractor shall remove all surface and adjacent subsurface roots as may be necessary to allow for planting directly in or adjacent to the stumping site and remove any additional turf or soil to eliminate “humps” or mounds in the parkway. All parkway areas are to be left flat and meet original grade and pitch from sidewalk to curb.

5. **Site Appearance and Disposal of Stump Grindings**

After grinding (removal) of a tree stump and all associated roots, the Contractor shall remove all stump grindings and associated debris from the site with appropriate tools and equipment for the job. Stumps, grindings, and debris shall be placed away from the curb and gutter, street, sidewalk, and private property immediately to eliminate hazards to vehicular and pedestrian traffic, and to eliminate damage to private property. The contractor shall clean up the site and remove all grindings and debris within twenty-four (24) hours of grinding. All streets, driveways, and sidewalks shall be swept clean. Care shall also be taken not to damage other trees, shrubs, or lawns during tree stump removal

operations. The bidder shall leave a barricade or cone in every cleaned hole until the location is backfilled.

Grinding debris generated by the work described in this contract shall be the responsibility of the contractor. Payment for removal and disposal of debris is to be included in the unit price. Environmentally accepted practices of debris disposal are also an important part of this work.

6. Backfilling

All areas where stumps have been removed and areas disturbed by the removal operation shall be backfilled and compacted to the level of the adjoining grade with pulverized black dirt (topsoil). This shall occur after the Forestry Superintendent or his designee confirms the stump grinding and cleaning has been done in a manner satisfactory to the contract. All holes must be backfilled within two business days of approval of Village staff. The Contractor shall supply his own topsoil. The topsoil shall be properly leveled and compacted so as to ensure a minimum of settlement of the backfill material. Grindings (chips) and debris must not be used as backfill material.

7. Seeding

All adjacent disturbed areas and areas where backfill material was installed shall be seeded. Seed shall be a mixture composed of fifty (50%) percent Kentucky Bluegrass, thirty (30%) thirty percent Perennial Rye Grass, and twenty (20%) percent Creeping Red Fescue or other mix approved by the Village Superintendent.

8. Stumping Oversight by the Village

The Village will provide the contractor with lists of approximately 30 stumps for completion the next business week. All stump grinding and cleaning associated with the work list must be completed within the first 2 business days of the week (weather dependent). Within 1 business day of confirmation from the bidder that work has been completed, the Forestry Superintendent or his designee will inspect the locations and verify they meet the specifications of the contract. The bidder will be notified of locations that are found to be insufficiently ground, cleaned, or leveled. Sites must be corrected at no additional cost to the Village. Once the bidder receives confirmation of approved sites they will have 2 business days to backfill and seed the locations. Once the list has been completed and verified by Village staff a new list will be generated. This process will repeat until the planned stump removals for the period are complete.

9. Notification to the Resident

Upon backfilling and seeding a location the bidder shall leave a notice to the adjacent property owner regarding the completion of the work and the necessary watering. This notice will be provided by the Village and will be either a door hanger or a post-it note to attach to the front door or window.

10. J.U.L.I.E.

The Contractor is responsible for any damage done to underground utilities while working in the parkway. The Contractor will submit the stump list to J.U.L.I.E. to be located prior to stump removal. The Contractor must submit the list to J.U.L.I.E. no more than three (3) working days after receipt from the Village. The Contractor must otherwise comply with all J.U.L.I.E. requirements.

11. Sucker Growth

In the event that adventitious (sucker) growth should occur, the contractor shall be responsible for regrinding to eliminate sucker growth during a period of one year after initial grinding. Re-grinds must also be restored to grade and reseeded at no additional charge to the Village. Care shall also be taken not to damage other trees, shrubs, or lawns during stump removal and restoration operations.

12. Method of Measuring

Stump removal shall be done on a flat rate, "per stump" basis.

13. Reporting

The bidder is responsible for keeping the Village updated on its work. The Village requires that the bidder provide immediate notice upon completing grinding and cleaning for inspection. The bidder must also alert the Village to completion of a list for inspection and assignment of additional stumps.

14. Add On Parkway Restoration

The bidder shall provide pricing for parkway restoration work. In some instances the parkway may be so disturbed or changed as a result of the parkway tree or the tree removal process that entire restoration with the installation of sod may be called for. These locations will be identified by the Village and the total square yardage of the proposed restoration will be determined. The bidder will be required remove any additional material or bring in additional top soil to restore the original grade of the parkway between the sidewalk and the curb for the length determined by the Village. The bidder will then install sod at the location. Pricing will be based on a square yard price for sod installation. All additional work, not including the parkway tree stumping is incidental to the sod price. If stumping is required at one of these locations it will be paid at the regular contract rate in addition to the square yard sod installation price.

Method of Payment

The Village of Oak Park will pay monthly, all undisputed of invoices within 30 days of approval as provided in the Local Government Prompt Payment Act, 50 ILCS505/4. The maximum interest rate for any payment not made within 30 days of approval is 1%.

Standard of Care

The Contractor shall comply with all federal, state, and local statutes, regulations, rules, ordinances, judicial decisions, and administrative rulings applicable to its performance under this Agreement as applicable, including, but not limited to, Cook County's minimum wage and sick leave ordinances, respectively Cook County Ordinance Number 16-5768 and Cook County Ordinance Number 16-4229, and the Village's Living Wage Ordinance, Village of Oak Park Ordinance Number 16-093, codified as Section 2-6-20 of the Village Code, all as amended. Contractor shall provide said certified payroll records within seven (7) days upon the request of the Director of Public Works.

Change Orders

Change Orders: Changes in the Work may be agreed to after execution of the Agreement, and without invalidating the Agreement, if the Change Order is in writing and signed. Any changes to the scope of work which result in an increase in the agreement price will be subject to an agreement addendum which must be signed by both parties. Any such Change Order will be prepared by the Village. The Contractor may only proceed with the Change upon receipt of the written Change Order signed by the Village.

Emergency Changes: Contractor may perform work not included in the Scope of Work if necessary to remedy a condition that poses an immediate threat to persons or property. Work of this nature shall be carried out only to the extent of bringing the condition under control. The Village shall be notified immediately. A Change Order will then be negotiated and executed for the work performed, and for work remaining, if any.

Minor Changes (Field Orders): The Village may verbally authorize minor changes in the Scope of Work in order to prevent a delay in the progression of the Work. These field orders may not involve a change in the agreement price or be inconsistent with the Scope of Work.

Changes Due to Unknown Conditions: The Contractor is not responsible for Changes in the Work that are due to conditions that were not reasonably observable or conditions that have changed. In such cases, the Contractor shall notify the Village and a Change Order will be negotiated.

Any Change which results in a total agreement price in excess of \$10,000 must be approved by the Village of Oak Park Board of Trustees.

Correction of Work Prior To Final Payment

The Village has the right to stop work if the Contractor fails to carry out the work in a manner acceptable to the Village. If the Village deems the Contractor's work unacceptable, at the Village's election, the Contractor shall do one of the following:

1. Promptly repair or replace the defective work, without expense to the Village, including costs associated with repairing any damage to property caused by the replacement work; or;
2. If the Village deems it unacceptable to have the Contractor correct work which has been incorrectly done, a deduction from the agreement price shall be made based on the costs to the Village to have the work repaired. Such a deduction from the agreement price shall in no way affect the Village's other remedies or relieve the Contractor from responsibility for defects and related damage occurring as a result of defective or unacceptable work.

Bidder's Representative

The bidder shall have at all times a competent foreman or superintendent on the job that shall have full authority to act for the bidder, and to receive and execute orders from the Director of Public Works or appointed representative. THIS INDEPENDENT CONTRACTOR AGREEMENT ("Contract") is entered into on this _____ day of _____, 2017, by and between the Village of Oak Park, an Illinois home rule municipal corporation (hereinafter the "Village"), and _____, a _____ (hereafter the "Contractor").

WHEREAS, Contractor submitted a Proposal dated _____, _____, a copy of which is attached hereto and incorporated herein by reference, to provide _____ (hereinafter referred to as the "Work") for the _____ (hereinafter referred to as the "Project") pursuant to the Village's Request for Proposals dated _____, _____, incorporated herein by reference as though fully set forth; and

WHEREAS, the Contractor represented in said Proposal that it has the necessary personnel, experience, and competence to promptly complete the Project and the Work required hereunder (hereinafter referred to as the "Work"); and

WHEREAS, Contractor shall perform the Work pursuant to the terms and conditions of this Contract.

NOW, THEREFORE, in consideration of the premises and the mutual promises contained in this Contract, and other good and valuable consideration received and to be received, it is mutually agreed by and between the parties as follows:

1. RECITALS INCORPORATED

The above recitals are incorporated herein as though fully set forth.

2. SCOPE OF WORK

Contractor shall perform the Work for the Project in accordance with its Proposal for a price not to exceed \$_____ plus \$_____ contingency for unforeseen conditions for a total cost of \$_____ ("Contract Price"). Contractor shall complete the Work in accordance with any applicable manufacturers' warranties and in

accordance with its Proposal, the Village's Request for Proposals, and this Contract, all of which, together shall constitute the "Contract Documents." The Contractor acknowledges that it has inspected the site(s) where the Work is to be performed and that it is fully familiar with all of the conditions at the site(s), and further that its Proposal has adequately taken into consideration all of the conditions at the sites. The Contractor hereby represents and warrants that it has the skill and experience necessary to complete the Work in a good and workmanlike manner in accordance with the Contract Documents, and that the Work shall be free from defects. Contractor shall achieve completion of all work required pursuant to the Contract Documents by _____, _____ ("Contract Time"). The Contract Time is of the essence. In the event the Contractor fails to complete the Work on or before said date, the Village shall be entitled to liquidated damages in the amount of \$500.00 per day for each day the Work remains uncompleted beyond the completion date set forth above. This amount is not a penalty, and the parties agree to said amount given the difficulties associated with determining or calculating damages to the Village in the event the Work is not completed on time. Contractor shall have no claim for damages, for compensation in excess of the Contract Price, or for a delay or extension of the Contract Time based upon conditions found at, or in the vicinity of, the site(s).

3. DESIGNATED REPRESENTATIVES

Contractor shall designate in writing a person to act as its designated representative with respect to the Work to be performed under this Contract who shall have the power and authority to make or grant or do all things, certificates, requests, demands, approvals, consents, notices and other actions required that are ministerial in nature or described in this Agreement for and on behalf of Contractor and with the effect of binding Contractor. The Village is entitled to rely on the full power and authority of the person executing this Contract on behalf of Contractor as having been properly and legally given by Contractor. Contractor shall have the right to change its designated representative by providing the Village with written notice of such change which notice shall be sent in accordance with Section 12 of this Agreement.

The Village's _____ shall be deemed the Village's authorized representative for purposes of this Agreement, unless applicable law requires action by the Corporate Authorities, and shall have the power and authority to make or grant or do those things, certificates, requests, demands, approvals, consents, notices and other actions required that are ministerial in nature or described in this Agreement for and on behalf of the Village and with the effect of binding the Village as limited by this Contract. Contractor is entitled to rely on the full power and authority of the person executing this Agreement on behalf of the Village as having been properly and legally given by the Village. The Village shall have the right to change its authorized representative by providing Contractor with written notice of such change which notice shall be sent in accordance with Section 12 of this Agreement.

4. TERM OF CONTRACT

Contractor shall perform the Work pursuant to this Contract beginning on the effective date as defined herein and ending on the date that the Work is completed as determined by the Village. The Contractor shall invoice the Village for the Work provided pursuant to this Contract at the rates set forth in its Proposal. The term of this Contract may be extended in writing for additional periods of time pursuant to the consent of the parties.

5. PAYMENT SCHEDULE

Contractor shall, as a condition precedent to its right to receive any payment, submit to the Village an application for payment and such receipts, vouchers, and other documents as may be necessary to establish the Contractor's payment for all labor and material and the absence of any interest whether in the nature of a lien or otherwise of any party in any property, work, or fund with respect to the Work performed hereunder. Such documents shall include, where relevant, the following forms, copies of which are attached hereto:

- (i) Contractor's sworn statement;
- (ii) Contractor's partial or final waiver of lien;
- (iii) Subcontractor's sworn statement(s); and
- (iv) Subcontractor's partial or final waiver of lien.

Payment by the Village shall be conditioned upon an inspection by the Village of the Work completed and submission of required waivers by the Contractor. Payment by the Village shall in no way constitute a waiver of, or relieve the Contractor from, any defects in the work. All payments shall be made in accordance with the Illinois Local Government Prompt Payment Act, 50 ILCS 505/1 *et seq.* Final payment for any Work performed by the Contractor pursuant to an invoice by Contractor shall be made by the Village to the Contractor when Contractor has fully performed the work and the work has been approved by the Village and submission of required waivers and paperwork by Contractor. Approval of the work and issuance of the final payment by the Village shall not constitute a waiver of, or release Contractor from, any defects in the work.

The Village shall have the right to withhold from any payment due hereunder such amount as may reasonably appear necessary to compensate the Village for any actual or prospective loss due to Work which is defective or does not conform to the Contract Documents; damage for which Contractor is liable hereunder; liens or claims of liens; claims of third parties, subcontractors, or material men; or any failure of the Contractor to perform any of its obligations under this Contract. The Village may apply any money withheld or due Contractor hereunder to reimburse itself for any and all costs, expenses, losses, damages, liabilities, suits, judgments, awards, and attorney's fees incurred, suffered, or sustained by the Village and chargeable to Contractor.

6. TERMINATION

The Village may terminate this Contract for cause, which includes but is not necessarily limited to, the Contractor's failure to perform the work pursuant to this Contract. Such obligation shall not be construed to negate, abridge or otherwise reduce any other right to indemnity which the Village would otherwise have. Contractor shall similarly protect, indemnify and hold and save harmless, the Village, its officers, officials, employees, volunteers and agents against and from any and all claims, costs, causes, actions and expenses, including, but not limited to, legal fees incurred by reason of the Contractor's breach of any of its obligations under, or Contractor's default of, any provisions of this Contract.
