Subject: Device at Adams and Wisconsin

Per your request for comments regarding the petition to implement a traffic-calming device at the intersection of Adams Street and Wisconsin Avenue, I would like to note the following. I have lived at [REDACTED] Wisconsin since 1992, and have never felt the need for anything other than what is already in place at that intersection.

Hospital traffic does not seem to be a problem, and while there may be someone who periodically goes through the intersection more quickly than he or she should, that could probably be said about every intersection in Oak Park. I hope we do not become a village where every intersection is made a four-way stop.

Thank you for your consideration of my comment.
