GIS Program Accomplishments of 2019 and Planned Items for 2020

This year, the Village's GIS program – which is staffed by Municipal GIS Partners, Inc. – completed several projects in collaboration with community staff. MGP aims to always be focused on projects that are most important to the strategic goals of the community. Below are some examples of completed projects as well as upcoming projects for 2020.

Accomplished in 2019

Department	Project Name	Description
Police	Video Camera Registration	Integrated street and address data to power video registration workflows and map locations of registered cameras
Public Works	Water and Sewer Utility Asset Management Training	Conducted training with Public Works Water and Sewer and Engineering Divisions to maintain the water and sewer utility data while in the field utilizing their mobile devices.
Development Customer Services	CityView Address Structure Clean-Up and Standardization	Improved the address data structure and quality in CityView to provide the end users with a more consistent and reliable interface.

Planned for 2020

Department	Project Name	Description
Development Customer Services	Business License Data Visualization	Visualize the business license data in mapping applications by incorporating the business license suite address database in GIS to better analyze businesses in Oak Park.
All Departments	Unit Address Standardization	Implement a standardized unit address internal policy and external ordinance to ensure great address data quality at the source.
