Background

The Public Works Department makes repairs to the underground water distribution and sewer collection systems. These repairs require excavation of the public streets which then must be repaired in a timely manner. The final pavement restoration consists of a concrete base course over the utility trench followed by a three inch asphalt surface.

The Village averages approximately 125-150 utility pavement repairs annually. Patching sizes vary; however a typical size is approximately 10' x 10'. This work also encompasses restoring sidewalks, curbs, and brickwork pavers damaged during water and sewer repairs.

Competitive bids were opened on February 1, 2019 when the Village issued a call for bids for 2019 Utility Pavement Patching Services. The low responsive bid was submitted by GA Paving, LLC of Bellwood, Illinois. They were awarded the 2019 contract on March 5, 2019. GA Paving has done excellent work for the Village.

The Request for Bids provides for two optional one year agreement renewals. This would be the first renewal.
